

PC-Crash 11.0 Installation

Please insert Disk 1 – “PC-Crash 11.0”. Please do NOT insert your dongle/USB hardware key at this time.

Prerequisites

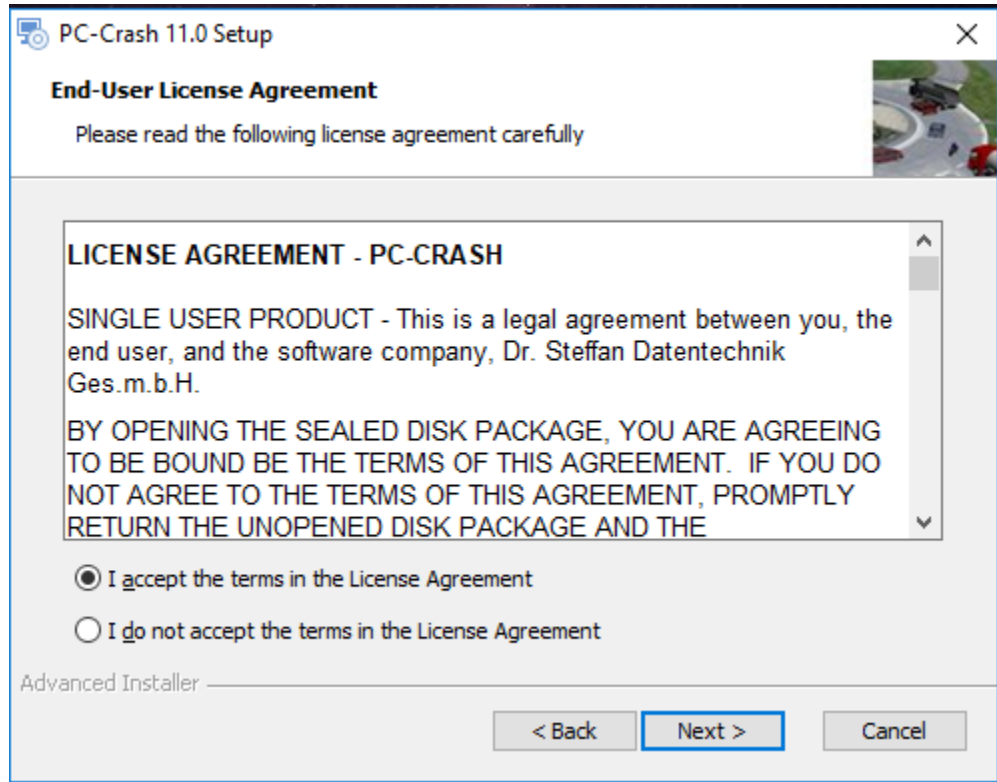

If you are installing PC-Crash for the first time on your computer, Prerequisites may be required and will need to be installed on to your computer. A window will appear if this step is required.

If a window appears, please select 'Next' and allow the Prerequisites to be installed. After the prerequisites are installed, PC-Crash 11.0 installation will begin.

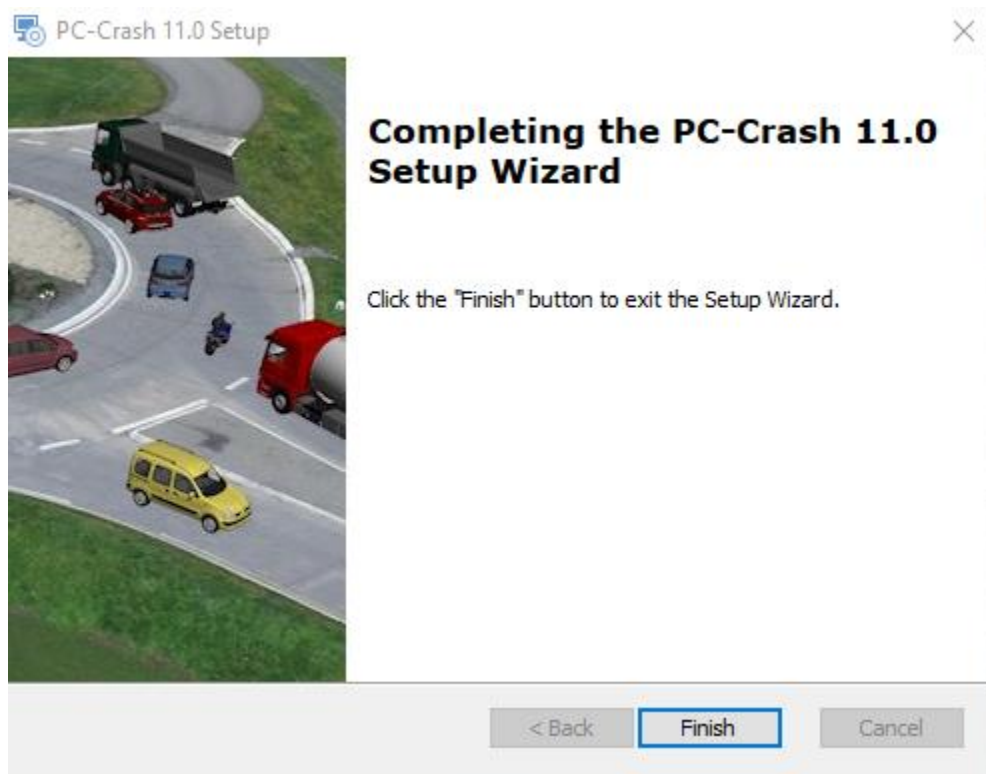

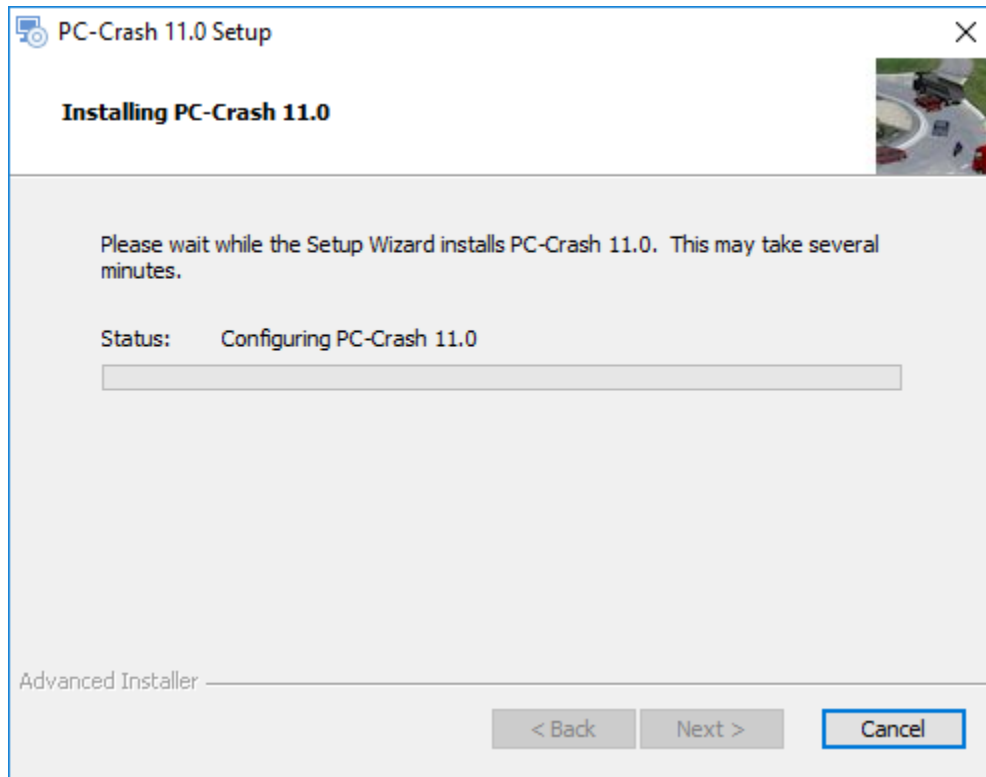

Please select 'Next' to continue.

You must accept the terms in the License Agreement, then select 'Next'.

Let the installer run. Once installation is complete, you will see the window below. Click the 'Finish' button to exit the Setup Wizard. Do not remove Disk 1 yet.

License Files

You must save the license files found on Disk 1 to your computer. On Disk 1 you will see a folder named "License Files".

Name	Date modified	Type	Size

In the "License Files" folder there will be 2 DLL files. If you do not see these 2 files please contact PC-Crash support (support@pc-crash.com).

-  Strlib32.dll
-  Strlib64.dll

Please copy both files and paste them into the folder named:  PCCrash110 in your “Program Files (x86)”. (This should be the same location in which PC-Crash would have been installed).

-  _Files
-  AMD
-  Apps
-  Dell
-  Drivers
-  inetpub
-  PerfLogs
-  Program Files
-  Program Files (x86)
-  Recovery
-  Users
-  Windows
-  StartMenu

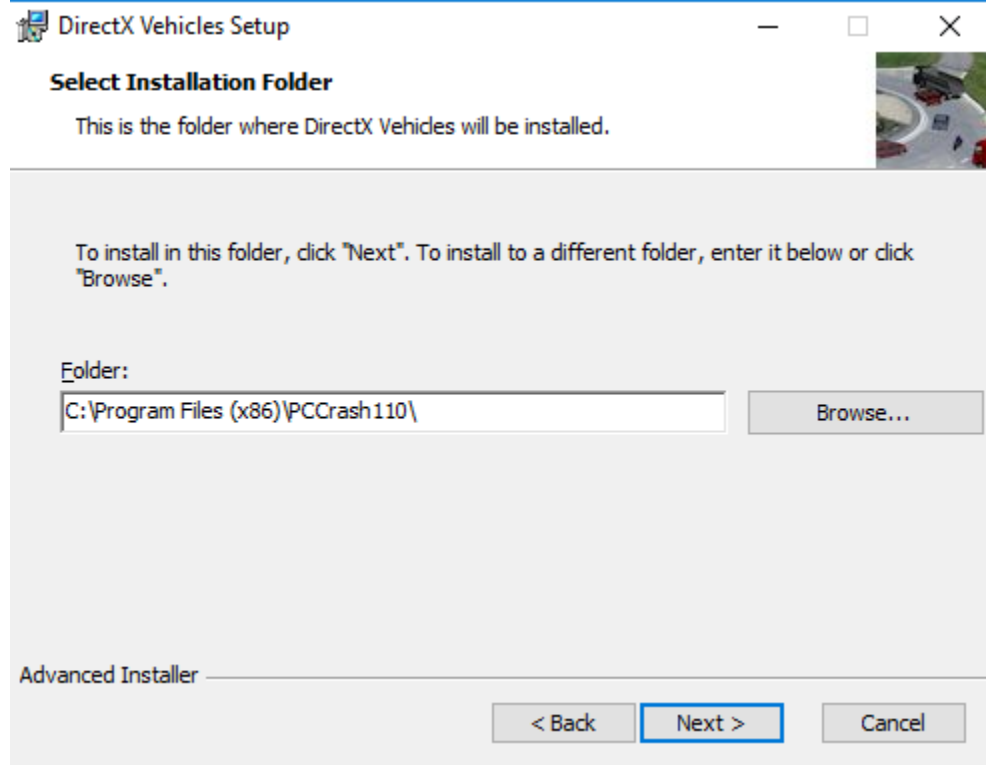

When pasting the license files, do not create a new folder, simply paste them into the “PCCrash110” folder. If there are already files with the same name in this folder, please select ‘Copy and Replace’. Disk 1 may be removed now.

DirectX Vehicles

Insert Disk 2 – “DirectX Vehicles”. Click ‘Next’ when the Setup Wizard appears and complete the steps in the following windows.

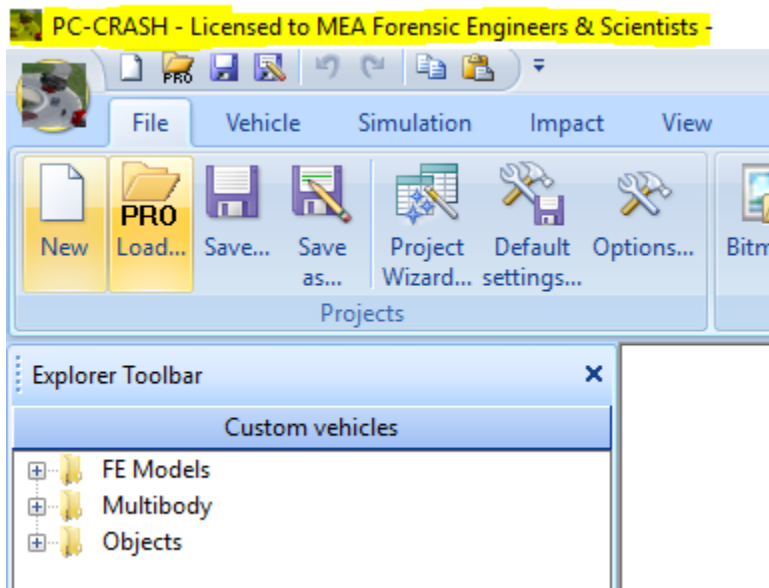

Once installation of Disk 2 – “DirectX Vehicles” is complete, follow the same procedure for Disk 3 – “DirectX Extras”.

PC-Crash is now ready to run. Please insert your dongle/hardware key and run PC-Crash using the icon on your desktop or the Start Menu. *The dongle must be inserted whenever you are using PC-Crash.

Once PC-Crash is running, your company name will appear at the top.

If your company name does not appear at the top and says “Demo Version”, please double check that your dongle/hardware key is illuminated and/or in a working USB port. Preferably use a port directly on the computer and not on a hub or extension cable.

Also, please check that you have saved the license files from Disk 1 to your computer (see “License Files” notes above in Disk 1 installation).

If you have checked the above and are still running in “Demo Version” please see our FAQ page on our website.
