

## PC-Crash 11.1 Installation Guide

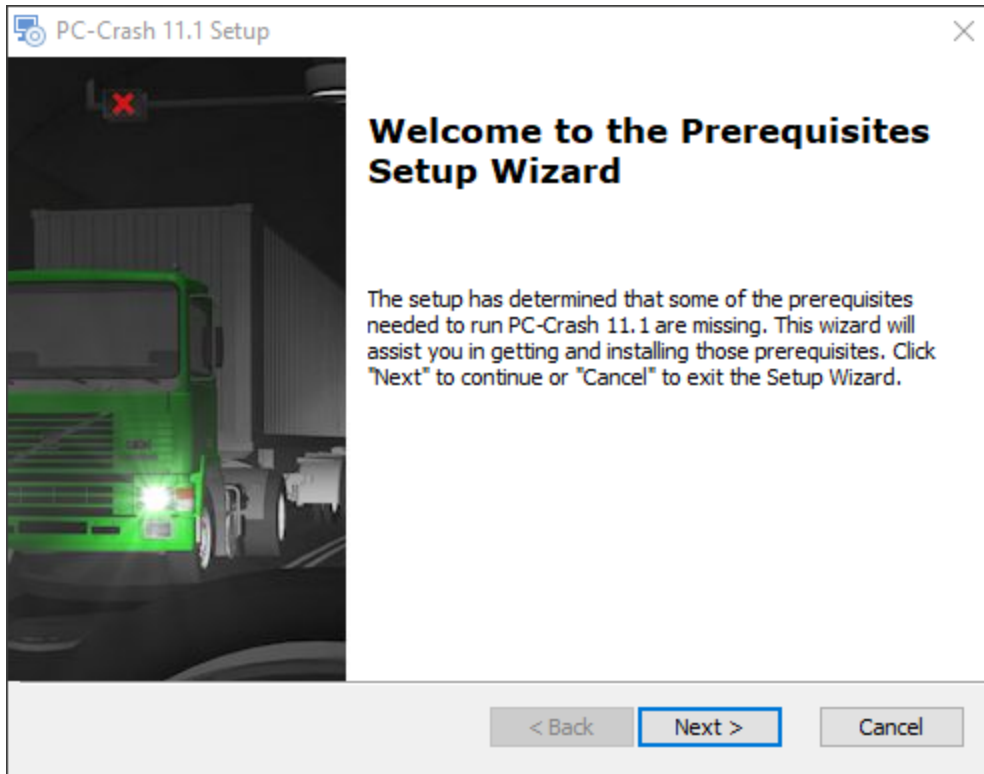

Please do NOT insert your dongle/hardware key at this time.

Open “Disk 1” folder. Double-click on the “Setup” application file (see screenshot below).

## Prerequisites

Some prerequisites may be required and will need to be installed on to your computer. If prerequisites are required, the window below will appear.

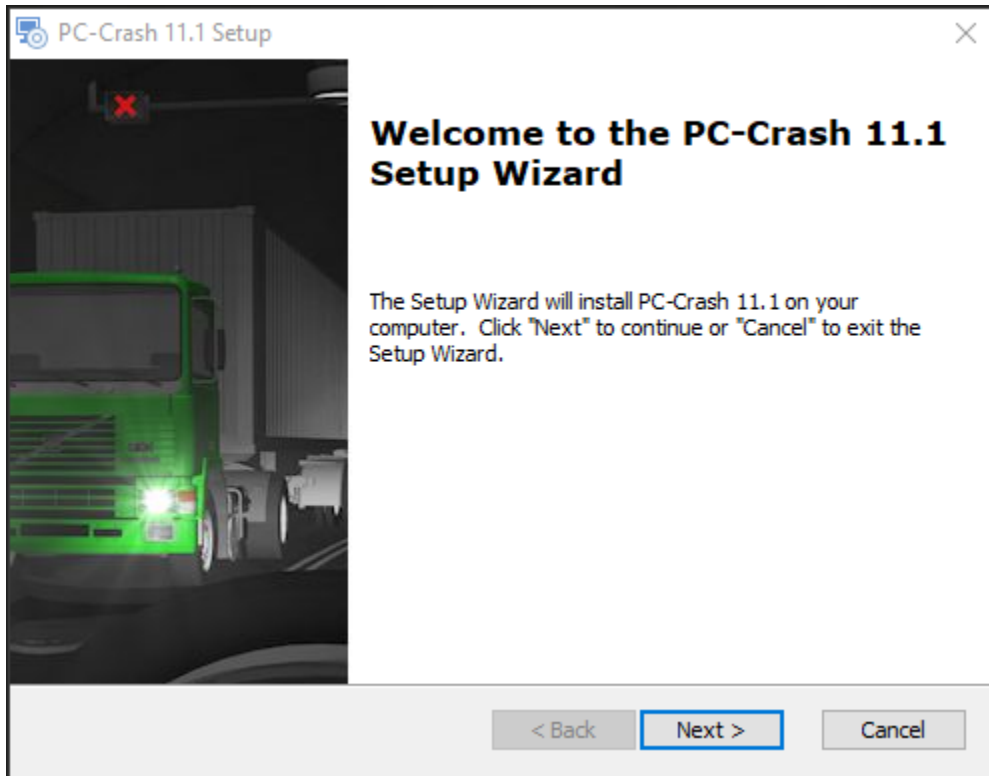

Please select 'Next' and allow the prerequisite(s) to be installed.

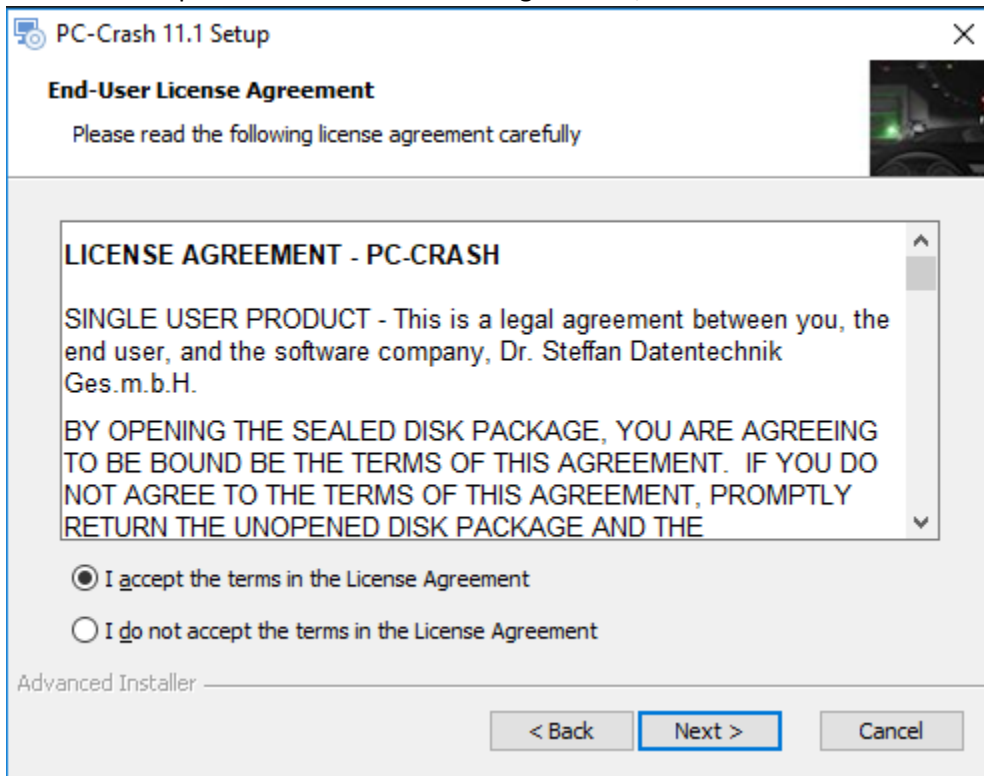

After the prerequisites are installed, PC-Crash 11.1 installation will begin.

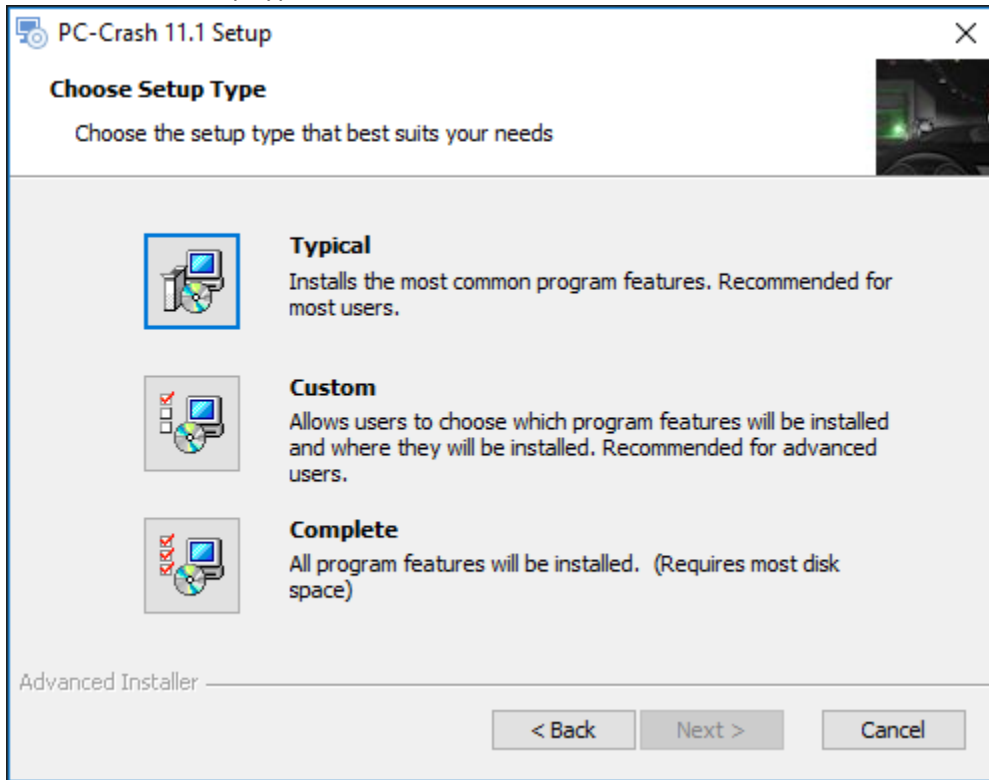

Please select 'Next' to continue with the installation.

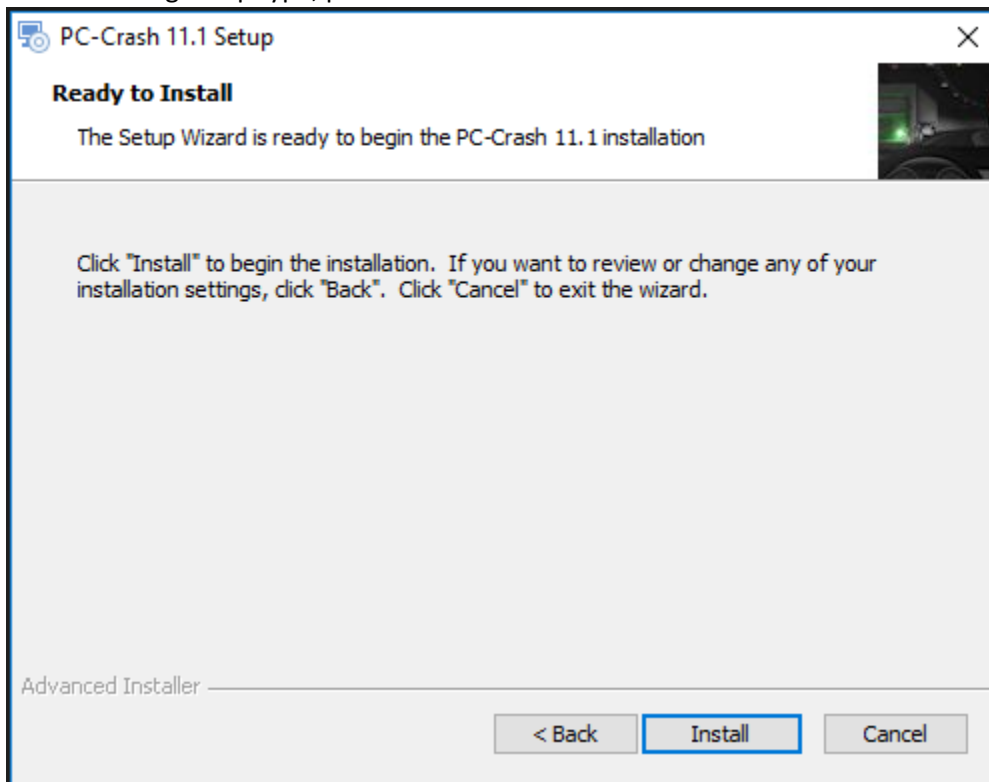

You must accept the terms in the License Agreement, then select 'Next'.

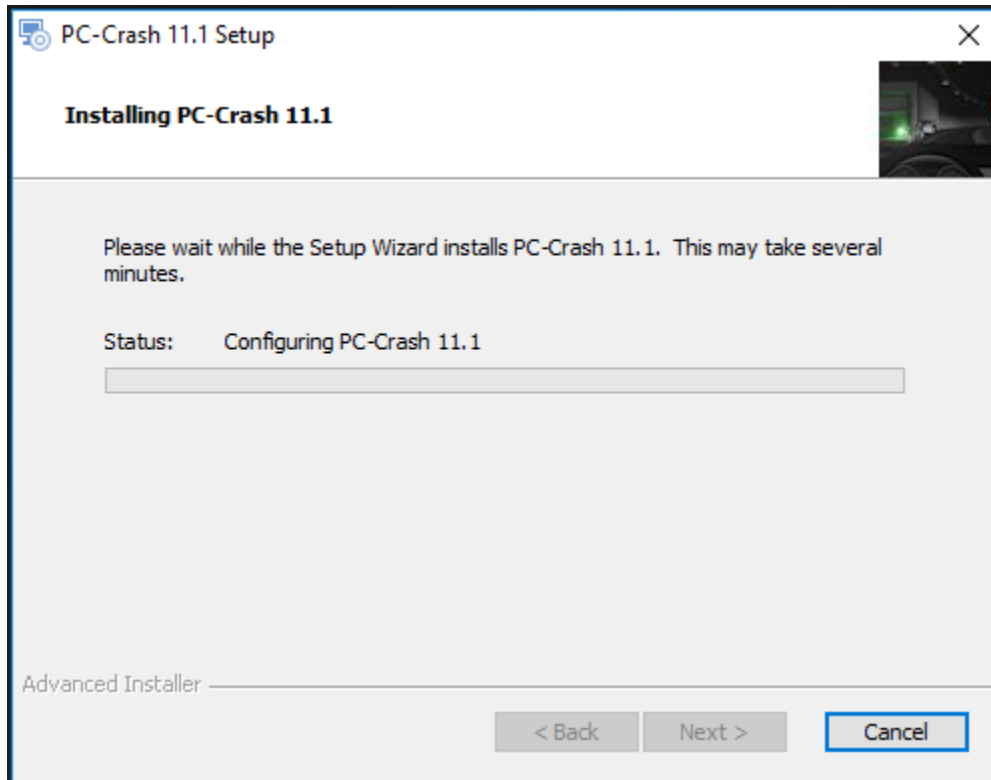

Please choose setup type.

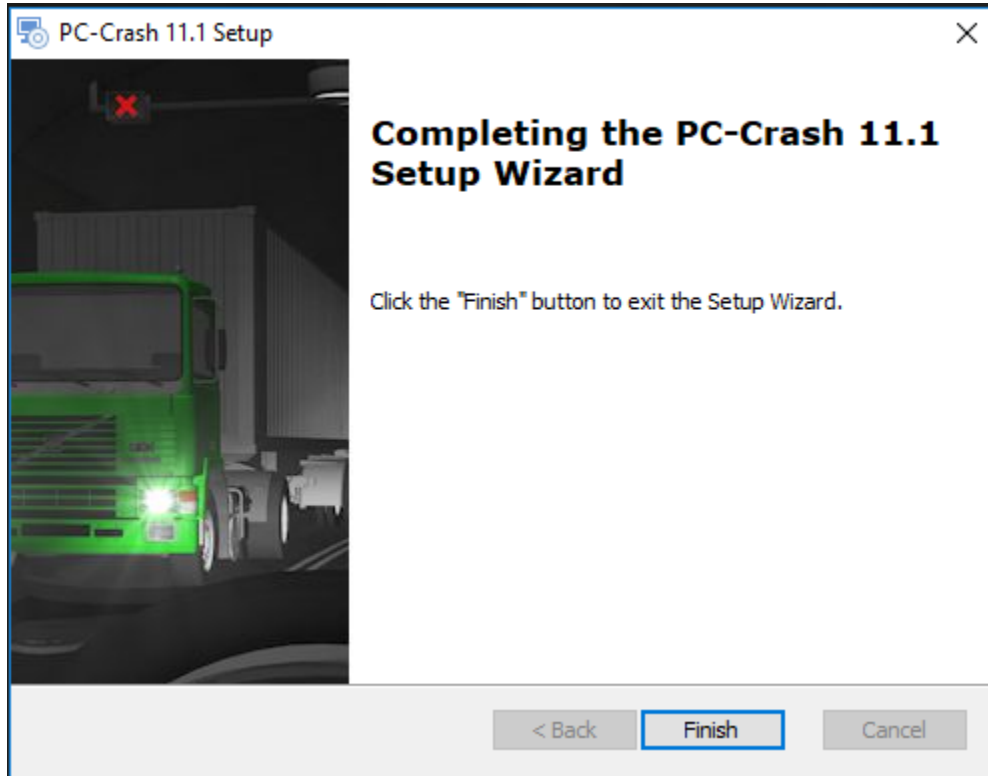

After selecting setup type, please select 'Install'.

Let the installer run.

Once the installation is complete, the window below will appear. Please select 'Finish' to exit.

## License Files

You must save the license files found in the Disk 1 folder to your computer.

 Acrobat9	2018-04-23 11:37 ...	File folder	
 AviSynth	2018-04-23 11:37 ...	File folder

In the 'License Files' folder there will be two .dll files. If you do not see these 2 files, please contact PC-Crash support ([support@pc-crash.com](mailto:support@pc-crash.com)).

-  Strlib32.dll
-  Strlib64.dll

Copy both files and paste them into the folder named:  PCCrash111 in 'Program Files (x86)'. (This should be the same location in which PC-Crash would have been installed.)

- Files
- 4N6XPRT
- AMD
- Apps
- Dell
- Drivers
- inetpub
- PerfLogs
- Program Files
- Program Files (x86)**
- Recovery
- Users
- Windows
- Windows.old
- StartMenu

When pasting the license files, do not create a new folder, simply paste them into the 'PCCrash111' folder. If there are already files with the same name in this folder, please select 'Replace files'.

Program Files (x86) > PCCrash111

## **DirectX Vehicles**

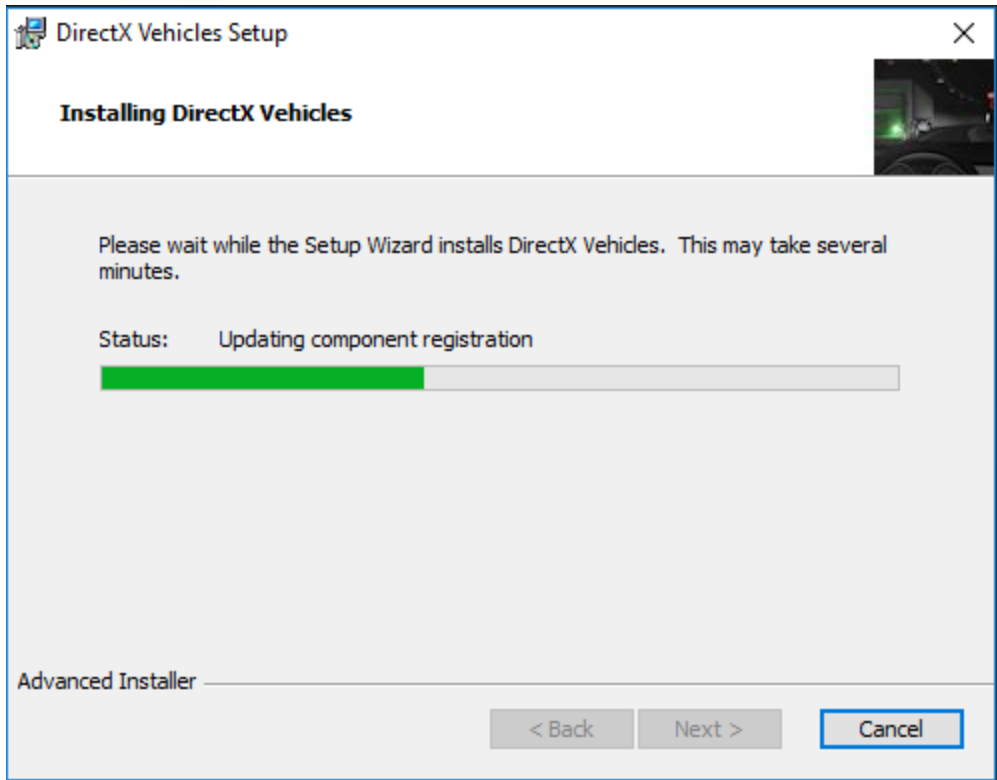

Open 'DirectX Vehicles' > 'DirectX' folder. Double-click the Windows Installer file 'DirectX' (see screenshot below) to begin the DirectX Vehicles Setup Wizard.

	Direc1	2017-03-23 5:45 PM	Cabinet File
	Direc2	2017-03-23 5:47 PM	Cabinet File
	Direc3	2017-03-23 5:49 PM	Cabinet File

	Direc12	2017-03-23 6:10 PM	Cabinet File
	<b>DirectX</b>	2017-03-24 10:22 ...	Windows Installer ...

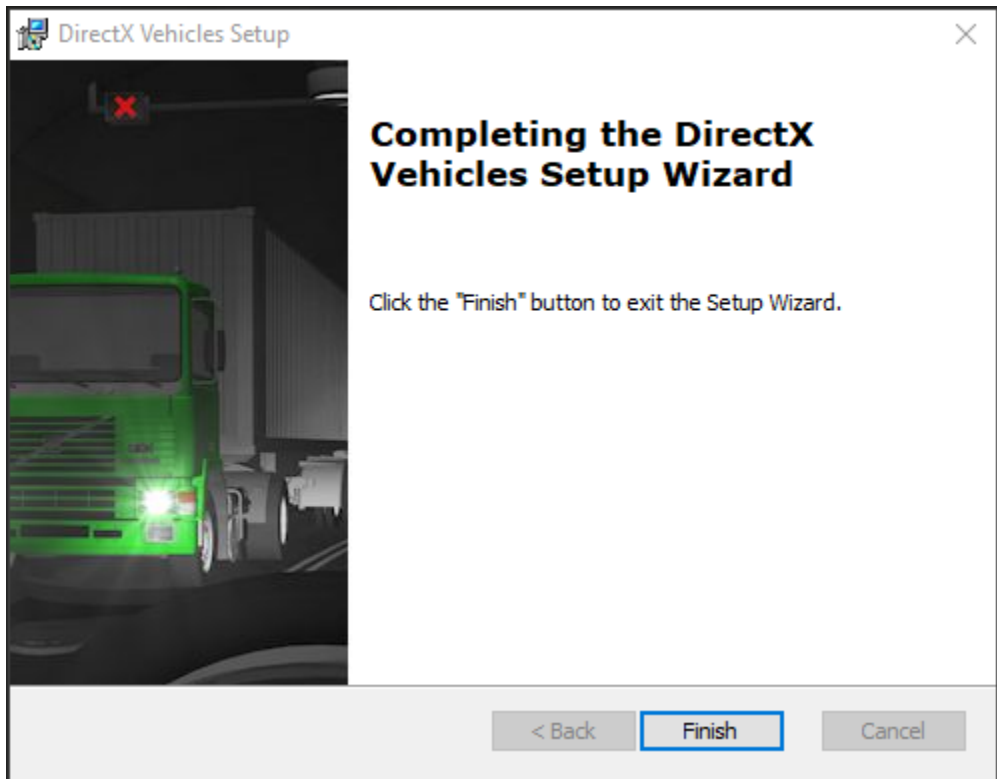

Please select 'Next' to continue.

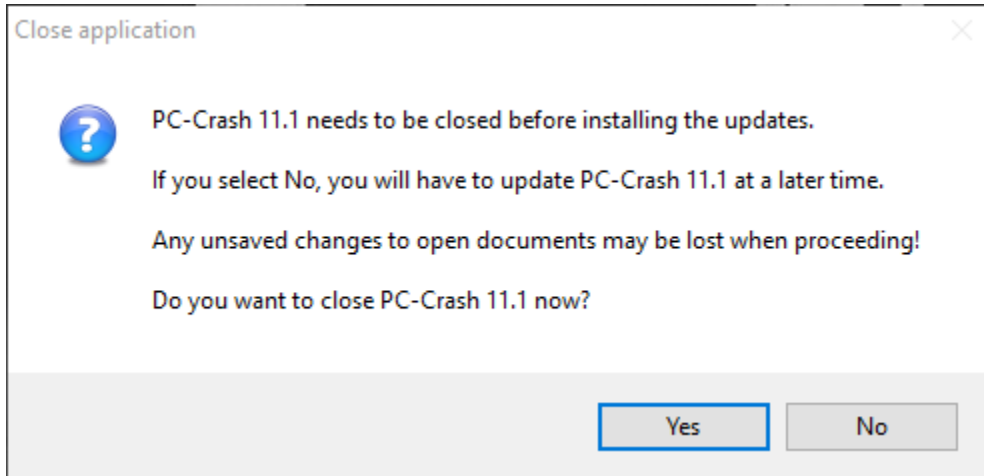

Click the 'Finish' to exit the Setup Wizard.

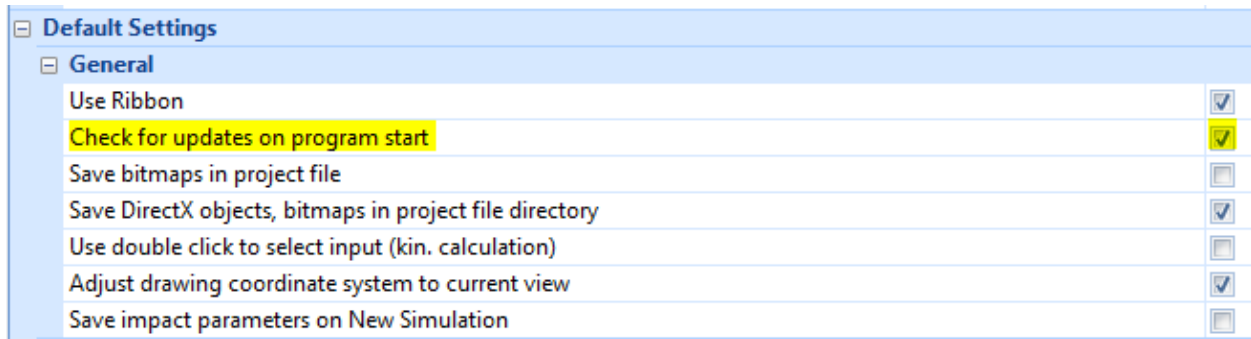

At start-up, PC-Crash will check for updates.

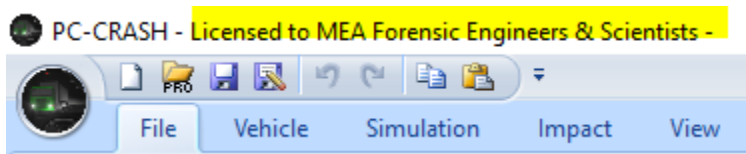

If you select 'Yes' to make changes, PC-Crash will check for updates and notify you before installing updates (see screenshot below). You should see another pop-up/notification once the new updates have completed installing.

If you would rather not check for updates on program start, or you do not have administrator privileges on your computer (speak with your IT department on what permission settings you have), you may turn this feature off. Once PC-Crash is open, navigate to File > Default Settings, in the pop-up window, scroll down until you find "Check for updates on program start". Select or de-select the tick box depending on your preference.

Once PC-Crash is running, your company name will appear at the top.

If your company name does not appear at the top and says “Demo Version”, please double check that you have saved the license files from the ‘Disk 1’ folder to your computer (see “License Files” notes above in Disk 1 installation).

Also check if your dongle/hardware key is illuminated and/or in a working USB port. Preferably use a port directly on the computer and not on a hub or extension cable.
