PC-Crash 12.0 Installation Guide

PC-Crash 12.0 Disk 1 Installation

Do NOT insert your dongle/hardware key at this time.

Open 'Disk 1' folder. Double-click on the 'Setup' application file (see screenshot below).

Prerequisites

At this time, setup will determine whether any prerequisites needed to run PC-Crash 12.0 are missing. A window named "Welcome to the Prerequisites Setup Wizard" will appear if necessary. Select 'Next' if this window appears. Another window will appear with some checkboxes filled, some empty.

PC-Crash setup will determine which prerequisites are missing on your computer. Please do not uncheck/check additional boxes.
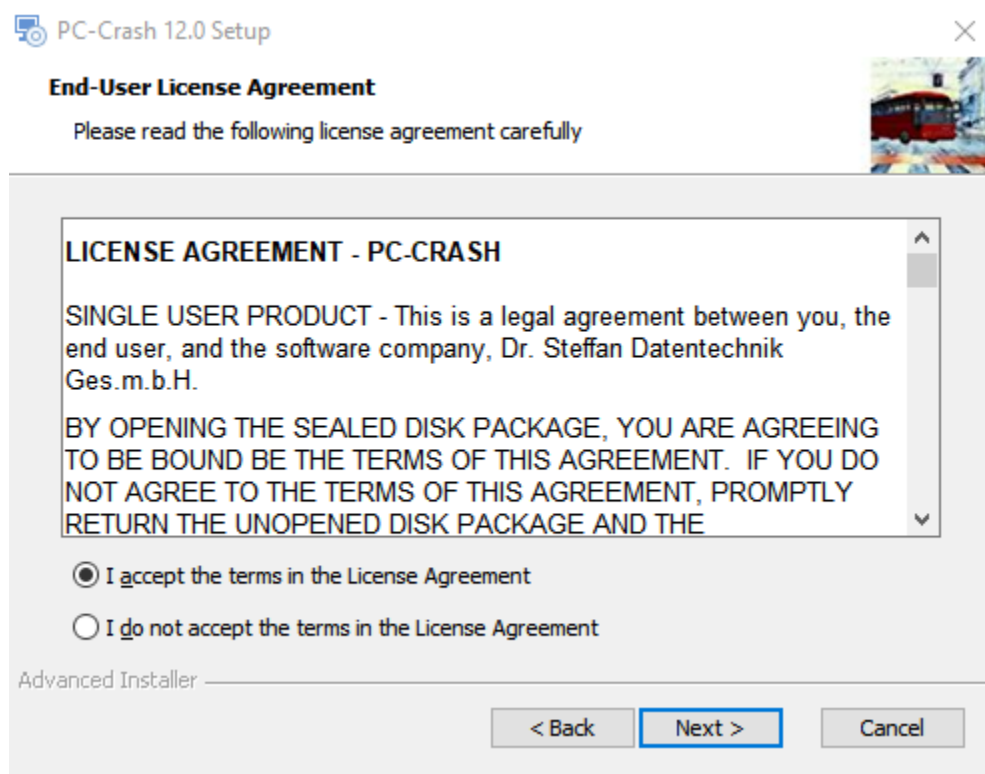

After the prerequisites are installed, PC-Crash 12.0 installation will begin.
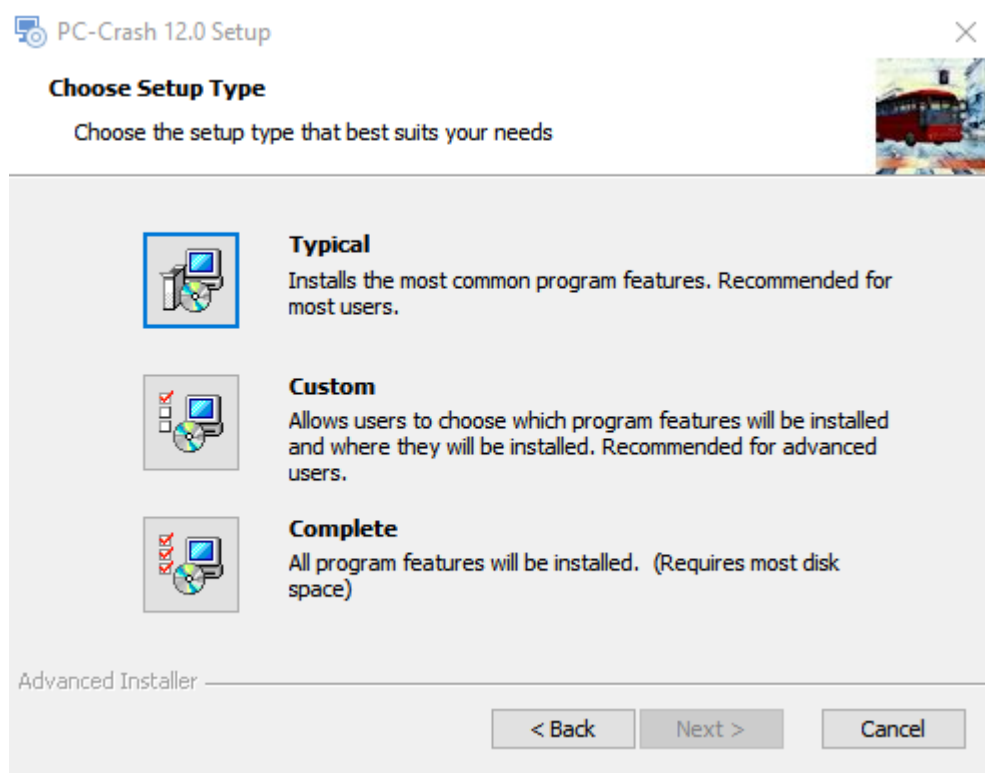

Disk 1 Installation continued

Select 'Next' to continue with the installation.
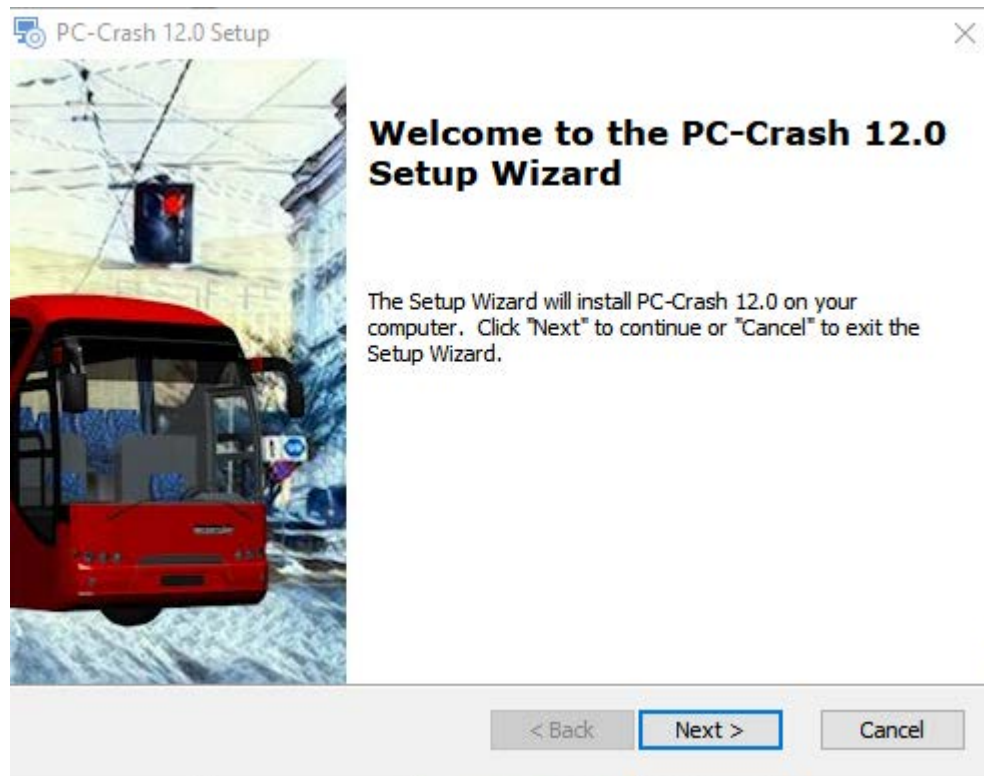

You must accept the terms in the License Agreement, then select 'Next'.

PC-Crash 12.0 Setup   ✕

End-User License Agreement

Please read the following license agreement carefully

LICENSE AGREEMENT - PC-CRASH

SINGLE USER PRODUCT - This is a legal agreement between you, the end user, and the software company, Dr. Steffan Datentechnik Ges.m.b.H.

BY OPENING THE SEALED DISK PACKAGE, YOU ARE AGREEING TO BE BOUND BE THE TERMS OF THIS AGREEMENT. IF YOU DO NOT AGREE TO THE TERMS OF THIS AGREEMENT, PROMPTLY RETURN THE UNOPENED DISK PACKAGE AND THE

Advanced Installer

[< Back] [Next >] [Cancel]

Please choose setup type

PC-Crash 12.0 Setup   ✕

Choose Setup Type

Choose the setup type that best suits your needs

Typical
Installs the most common program features. Recommended for most users.

Custom
Allows users to choose which program features will be installed and where they will be installed. Recommended for advanced users.

Complete
All program features will be installed. (Requires most disk space)

Advanced Installer
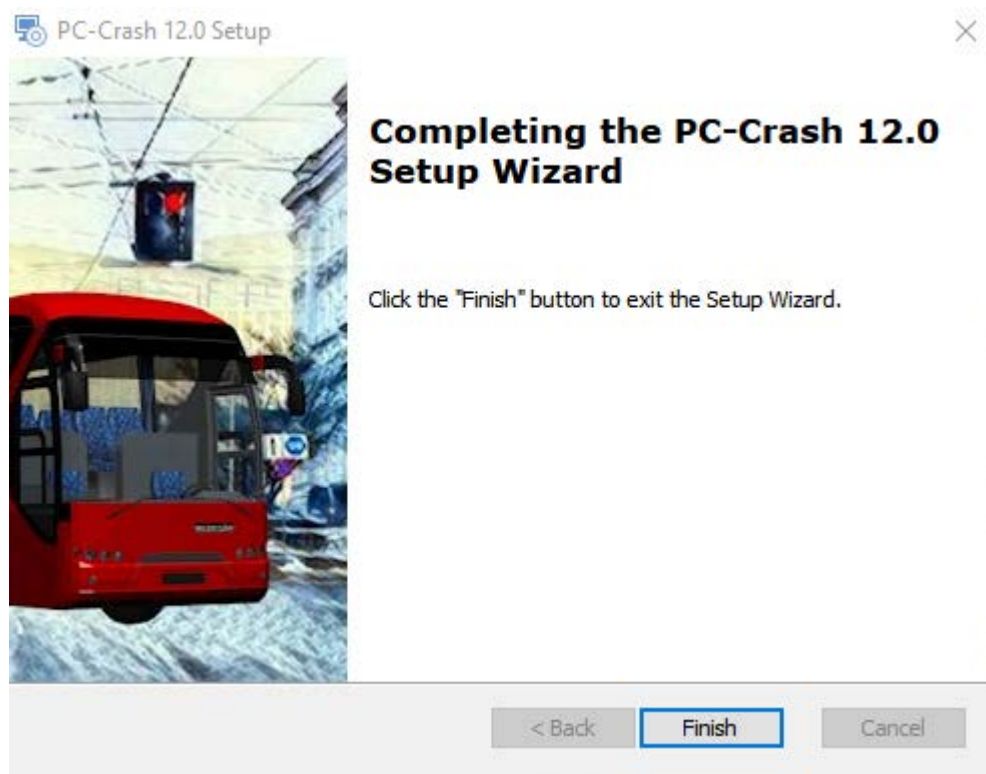

[< Back] [Next >] [Cancel]

After selecting setup type, select 'Install'.

Let the installer run

Once the installation is complete, the window below will appear. Select 'Finish' to exit.

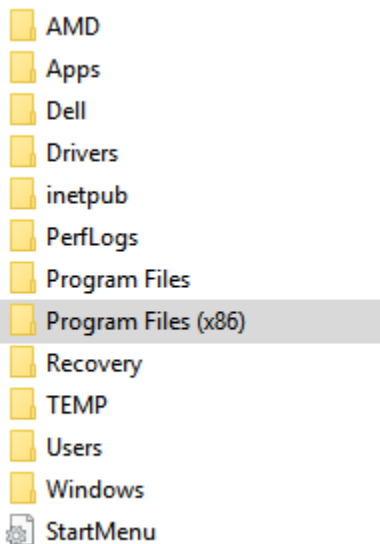

Licence Files

You must save the licence files found in the 'Licence Files' folder to your computer.

There will be two .dll files. If you do not see these two files, please contact PC-Crash Support (support@pc-crash.com).

Copy both files and paste them into the folder named 'PCCrash120'. This folder is found in 'Program Files (x86)'. (This should be the same location in which PC-Crash would have been installed; usually the 'C' drive).

- AMD
- Apps
- Dell
- Drivers
- inetpub
- PerfLogs
- Program Files
- Program Files (x86)
- Recovery
- TEMP
- Users
- Windows
- StartMenu

When pasting the licence files, do not create a new folder. Simply paste them into the 'PCCrash120' folder.

OS (C:) > Program Files (x86)

Name
- ifileplayback
- Image Resizer for Windows
- Intel
- Internet Explorer
- Microsoft Chart Controls
- Microsoft Dynamics NAV
- Microsoft Office
- Microsoft SDKs
- Microsoft SQL Server
- Microsoft.NET
- Mozilla Maintenance Service
- MSBuild
- NewBlue
- NSIS Uninstall Information
- Onetastic
- Open XML SDK
- ownCloud
- PayneGroup
- PCCrash90
- PCCrash102
- PCCrash110
- PCCrash111
- PCCrash120
- PCRect42
- proDAD
- Realtek

If there are already licence files with the same name in this folder, please select 'copy and replace'. At this point PC-Crash can be launched; however, further installation steps are required in order to load the DirectX vehicle shapes.

# DirectX Vehicles Installation

DirectX (1 of 2)

Open 'DirectX Vehicles' > 'DirectX' folder.
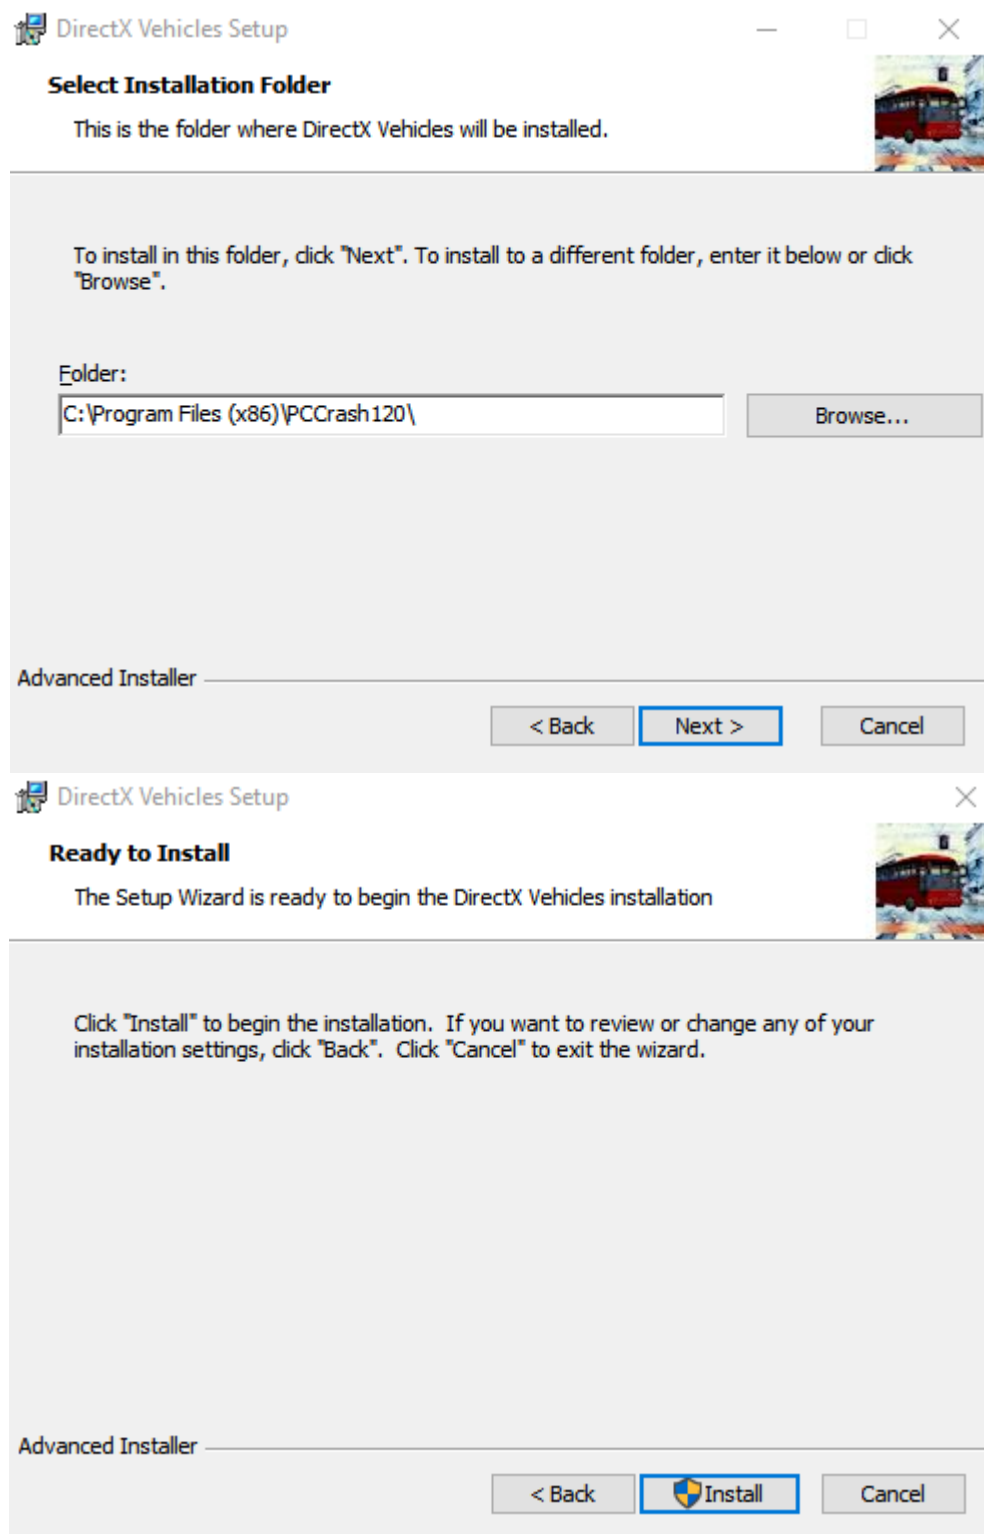

Double-click the Windows Installer file 'DirectX' (see screenshot below) to being the DirectX Vehicles Setup Wizard.

Direc10	Cabinet File
Direc11	Cabinet File
Direc12	Cabinet File
DirectX	Windows Installer ...

Select 'Next' to continue.

A window may pop up asking 'Do you want to allow this app from an unknown publisher to make changes to your computer?' Select 'yes'.
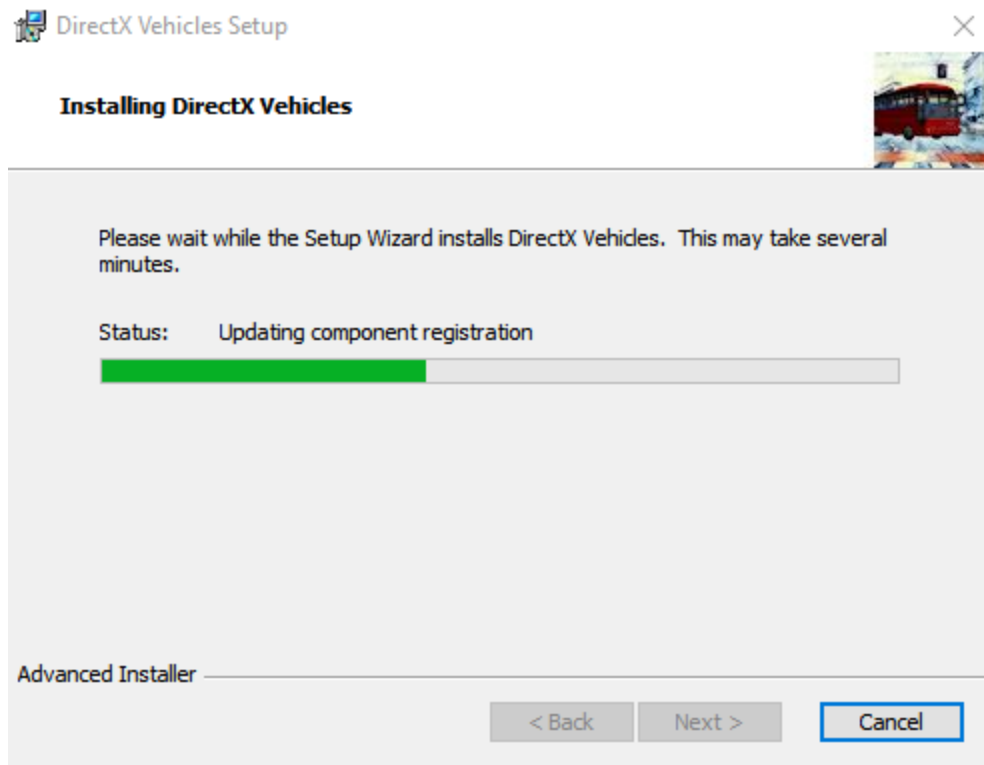

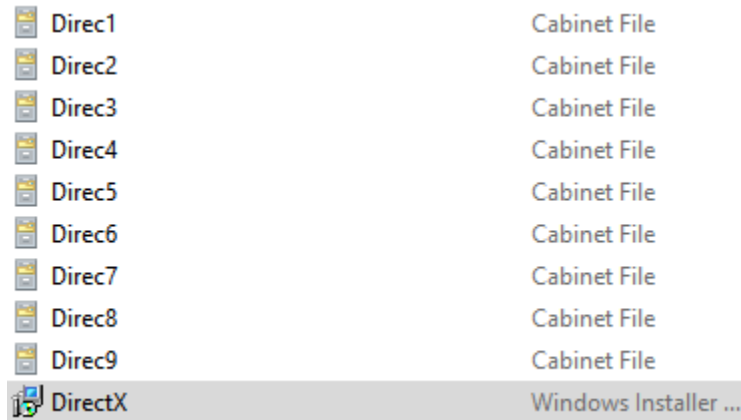

Select 'Finish' to exit the Setup Wizard.

DirectXMisc (2 of 2)
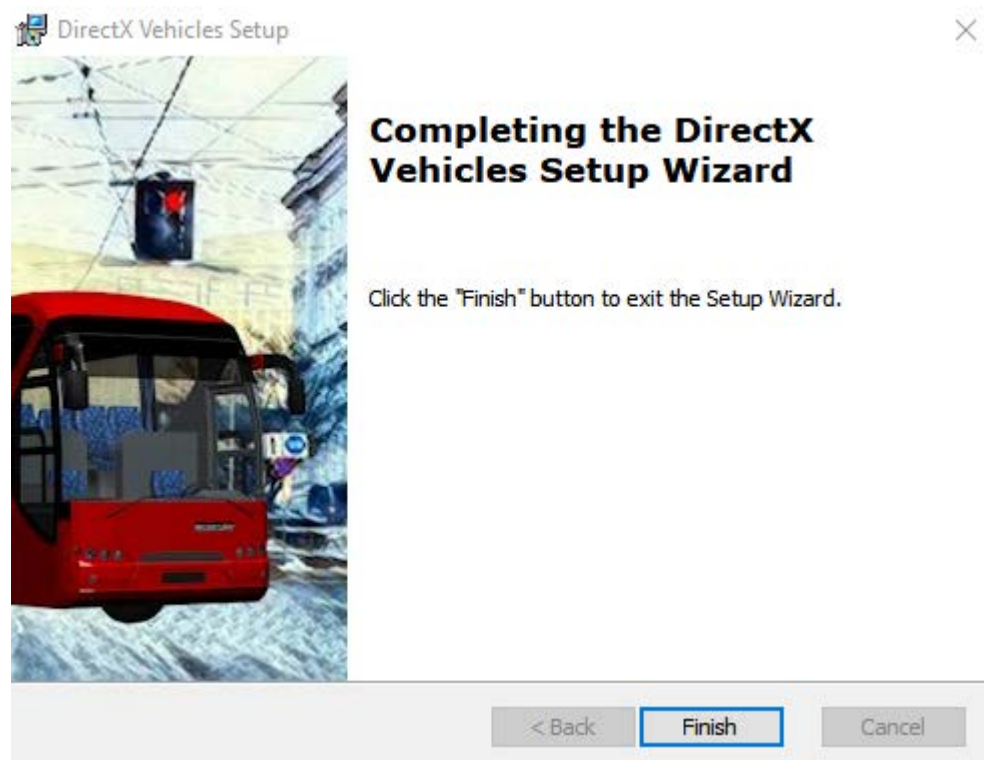

DirectX
DirectXMisc
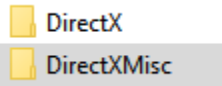

Once installation of 'DirectX Vehicles' is complete, follow the same procedure for 'DirectX Vehicles > 'DirectXMisc'. The installer windows will look identical to the 'DirectX' setup above.

Direc4	Cabinet File
Direc5	Cabinet File
Direc6	Cabinet File
Direc7	Cabinet File
Direc8	Cabinet File
Direc9	Cabinet File
DirectX	Windows Installer ...

Once installation of 'DirectXMisc' is complete, PC-Crash has now been completely installed including DirectX vehicle shapes. Insert your dongle/hardware key to run PC-Crash. PC-Crash will open in demo version if a dongle/hardware key is not inserted.
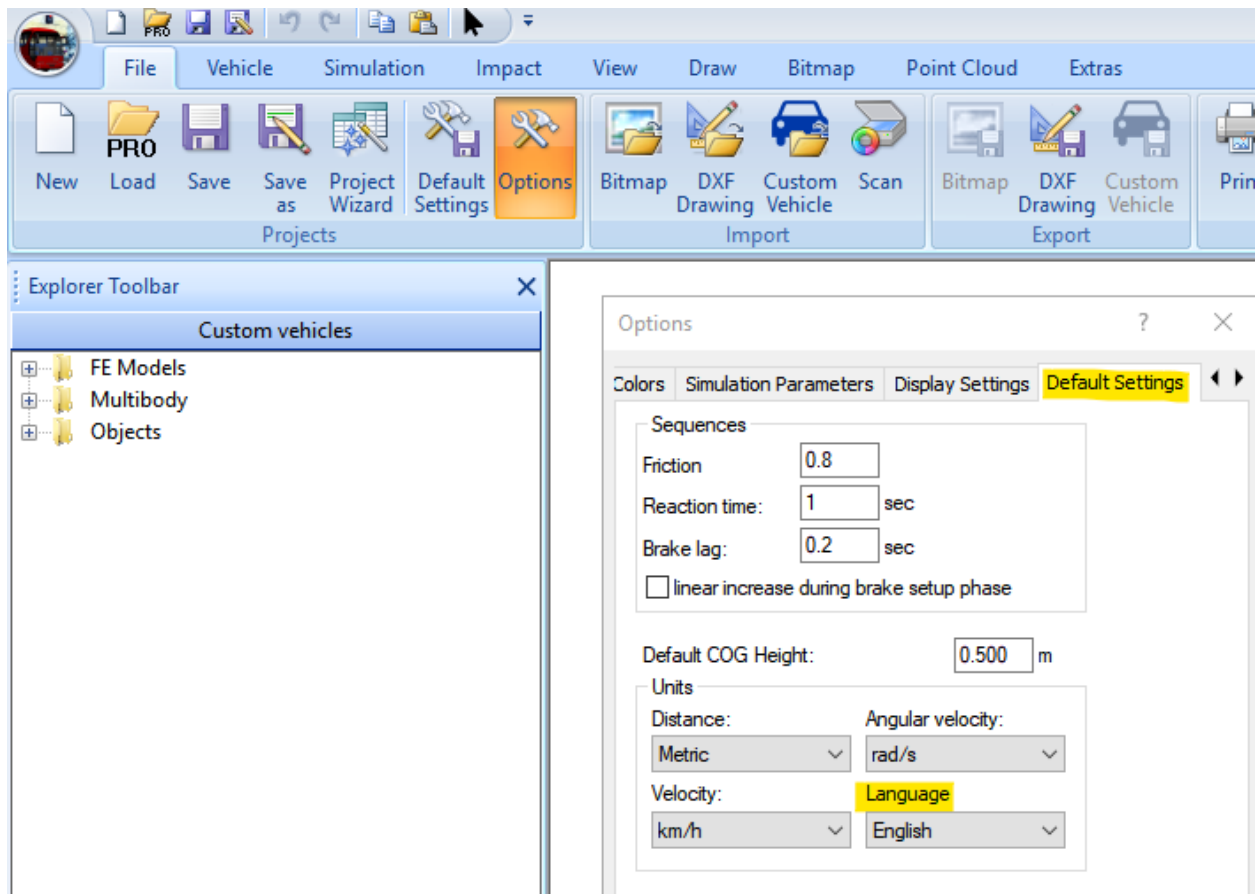

Run PC-Crash

Language

The language selection window will appear the first time you launch PC-Crash. Choose language accordingly.
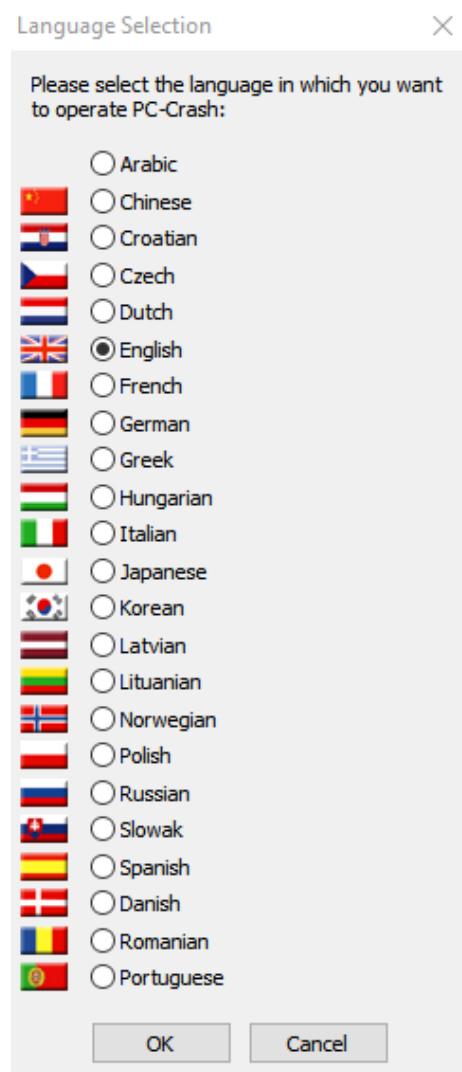

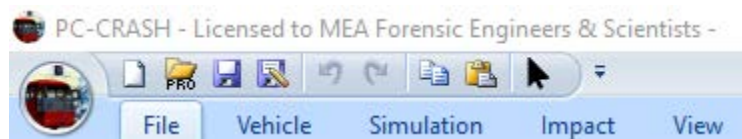

If you need to change the language later, this setting is found under 'Options' > Default Settings (as shown below)

Licence verification

When PC-Crash is running (and your dongle/hardware key is inserted), your company name will appear at the top of the window.

If your company name does not appear at the top and says 'Demo Version', please double check that you have saved the licence files to the 'PCCrash120' folder on your computer as noted on page **6**.

Also check if your dongle/hardware key is illuminated and/or in a working USB port. Preferably use a port directly on the computer and not on a hub or extension cable.

Still running in 'Demo Version'? Please see our FAQ page on our website (www.pc-crash.com) for further troubleshooting, or you can reach us at 1-800-565-3040, or by email:

PC-Crash Support:

support@pc-crash.com
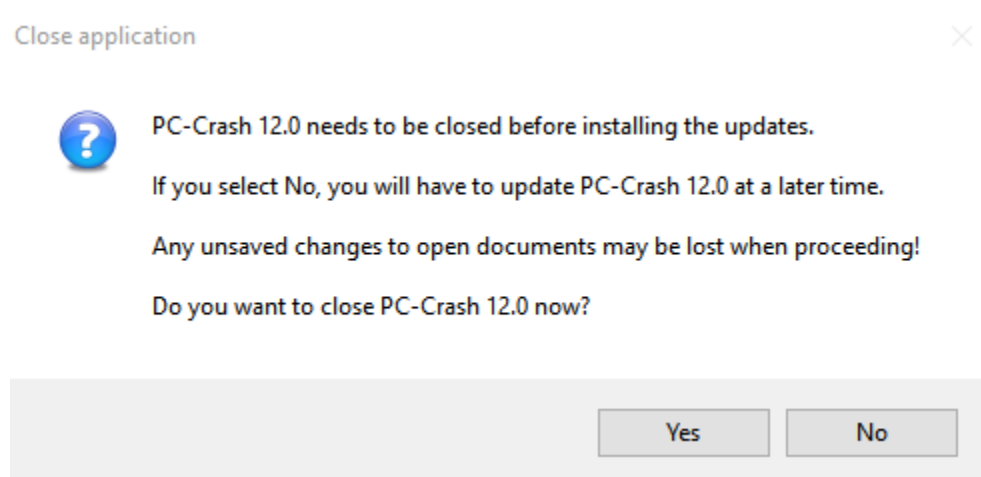

PC-Crash Updater

After launching PC-Crash, you may also have another pop-up window 'updater.exe' requesting to make changes to computer. At start-up, PC-Crash will check for updates.

If you select 'Yes' to make changes, PC-Crash will check for updates and notify you before installing updates. Once the update check is complete, you will see the following window if there no new updates:
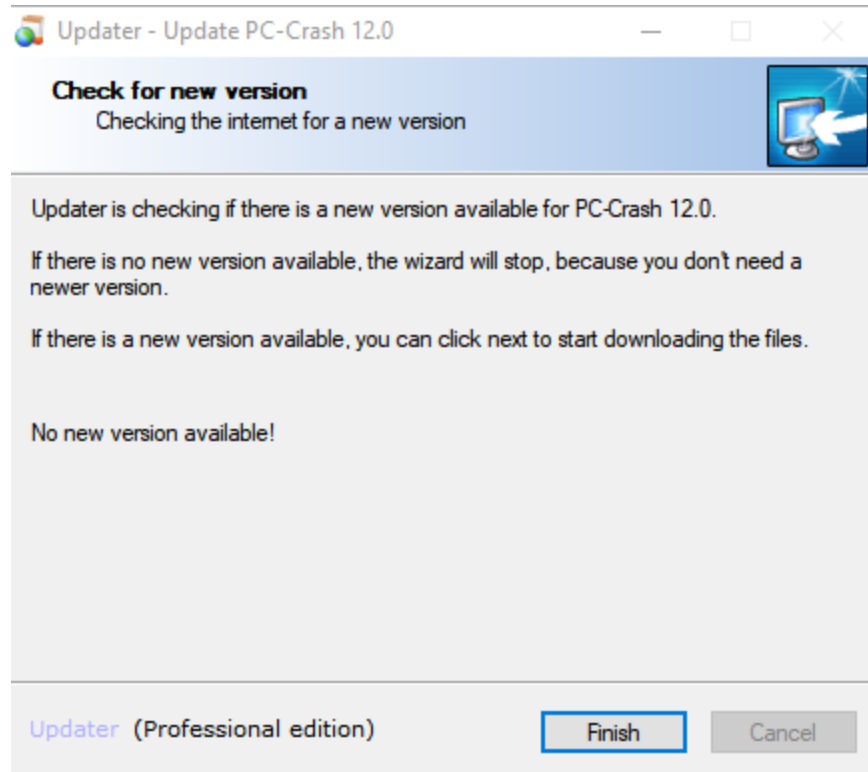

Or this window if an update is available:

Sometimes the updater can slow down launching of PC-Crash. If you would rather not check for updates on program start, or you do not have administrator privileges on your computer (speak with your IT department on what permission settings you have), you can turn this feature off.

Once PC-Crash is open, go to 'Default Settings', scroll down until you find "Check for updates on program start". You may need to expand menus if you can not find this option. Select or de-select the check box depending on your preference. Hit 'Apply' and 'Save', then close the window.
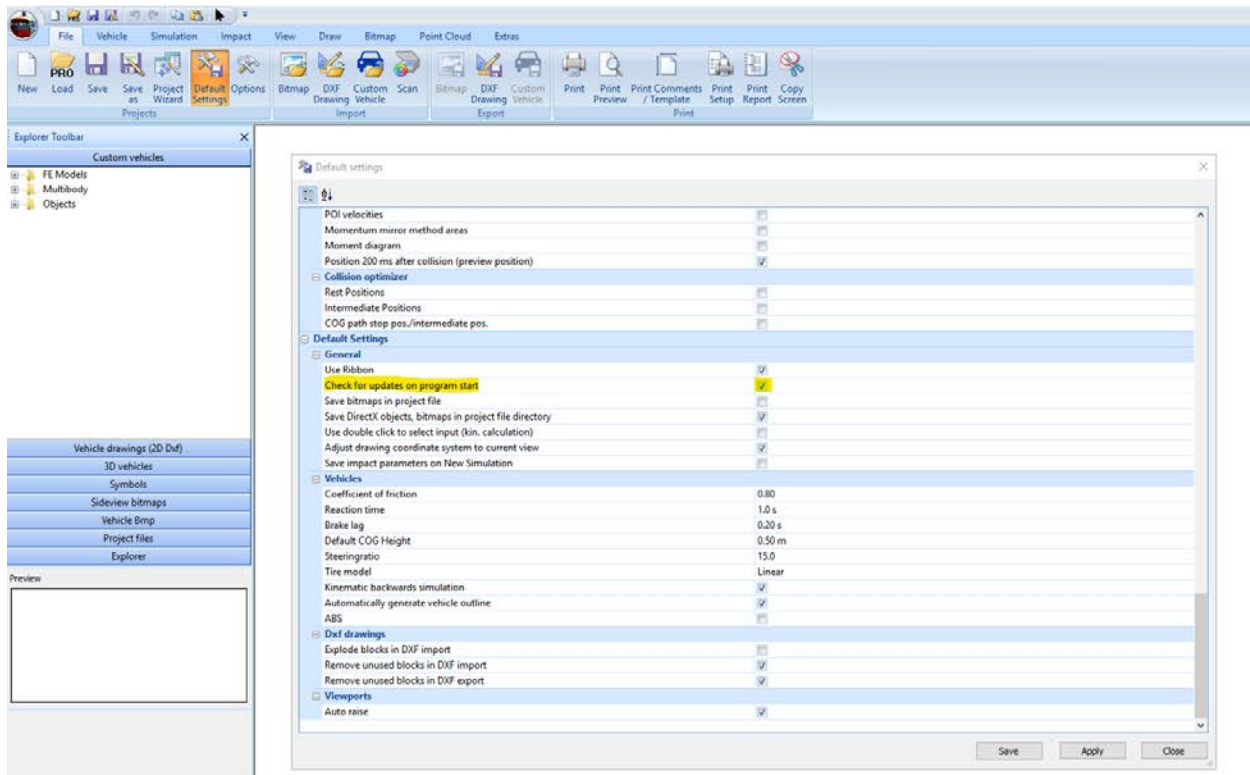

If you would like to see which version number you are operating, navigate to "About PC-Crash" which is found under the "Extras" tab. Yellow highlight below shows the version number; blue line shows the number of the dongle inserted at time of operation.
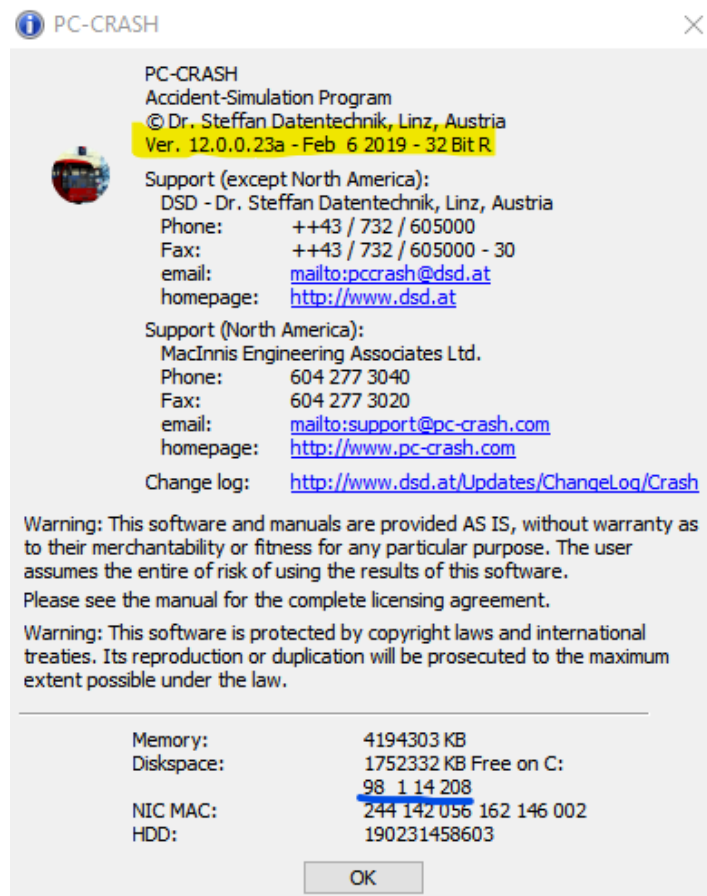

At any time, you can check for updates manually by navigating to the 'Extras' tab > 'Check for Updates'
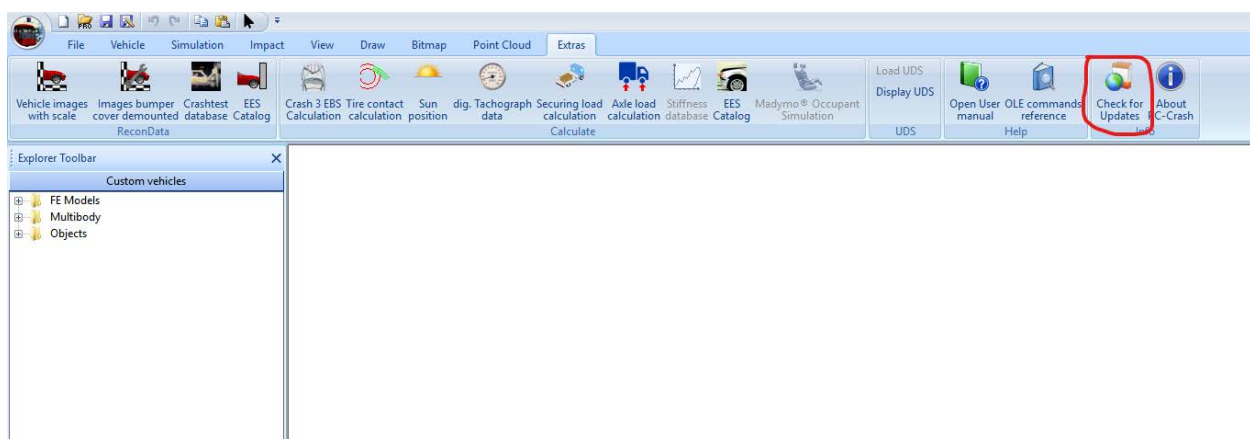

Vehicle Database

To access North American vehicles, go to default settings and change the vehicle database directory to the SPECS folder in your PC-Crash program folder.
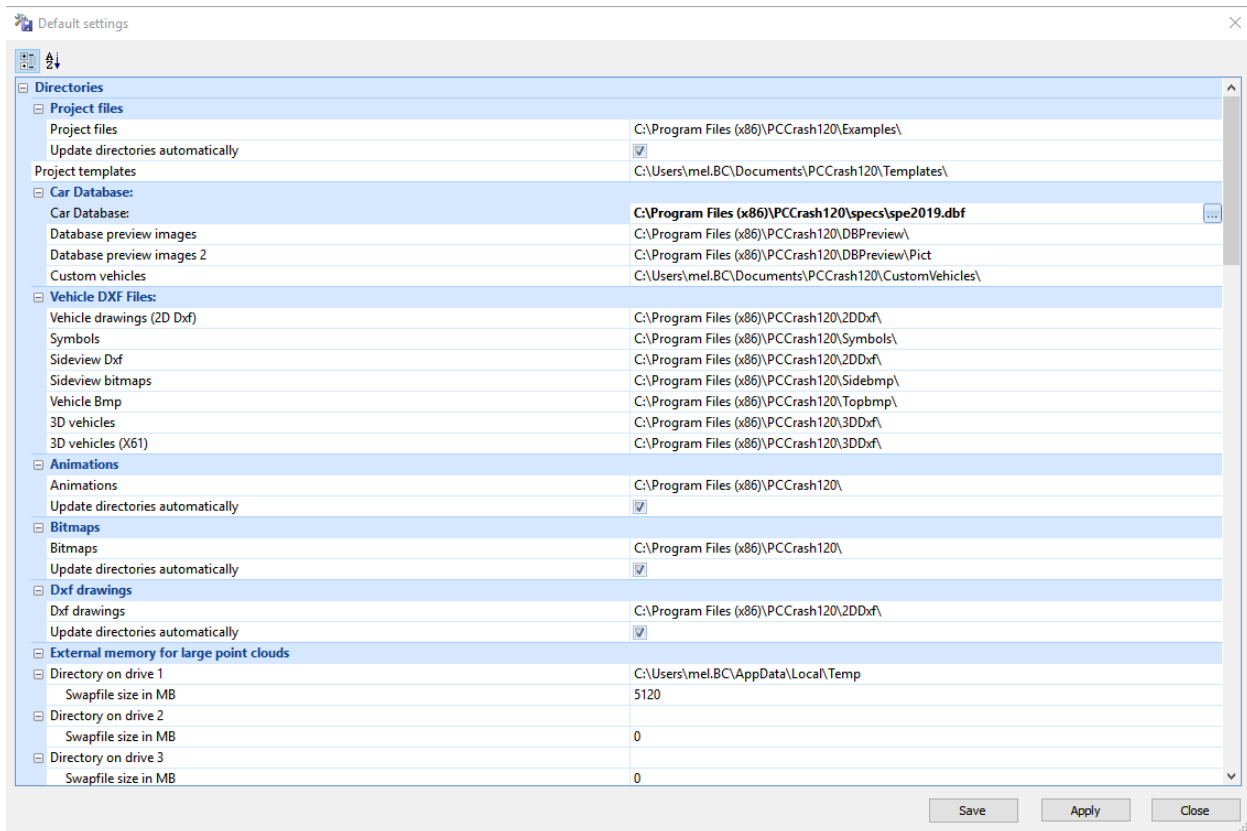

To update the vehicle database to include the latest model year:

Please visit our website: PC-Crash FAQ and navigate to the following:

Select "Download this SPECS" to download the update.

Unzip to the 'specs' subfolder in your PC-Crash program folder
