PC-Crash 12.1 Installation Guide

PC-Crash 12.1 Disk 1 Installation

Do NOT insert your dongle/hardware key at this time. Open <u>Disk 1</u> folder. Double-click on the <u>Setup</u> application file (see screenshot below).

Prerequisites

At this time, setup will determine whether any prerequisites that are needed to run PC-Crash 12.1 are missing. A window named "Welcome to the Prerequisites Setup Wizard" (see below) will appear if necessary.

Select <u>Next</u> if this window appears. Another window will appear with some checkboxes filled, some empty.

PC-Crash setup will determine which prerequisites are missing on your computer. Please do not uncheck/check additional boxes.
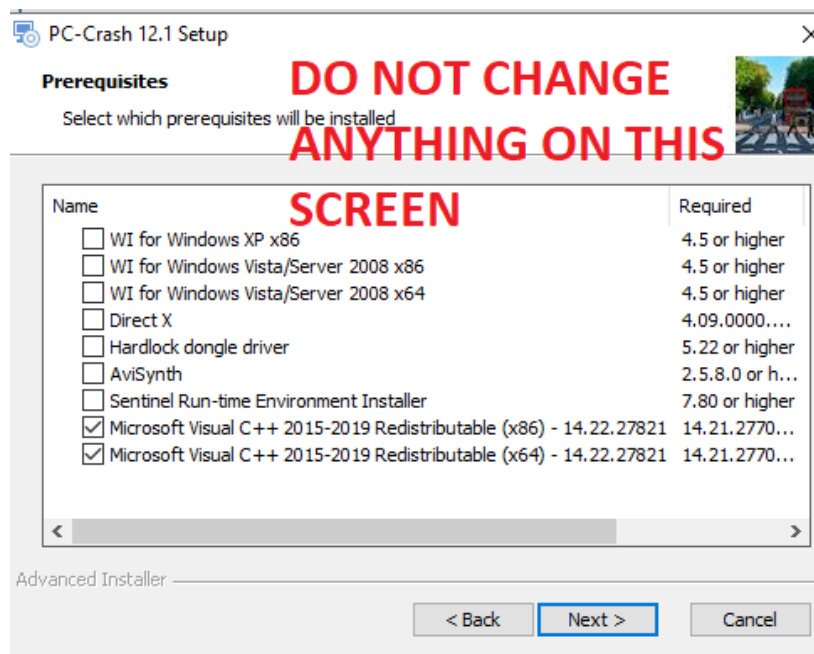

Microsoft Visual C++

Most commonly, the x86 and x64 Microsoft Visual C++ Redistributables will need to be installed. Please install both the x86 and x64 versions.

Microsoft Visual C++ 2015-2019 Redistributable (x86) - 14.... — □ ✕
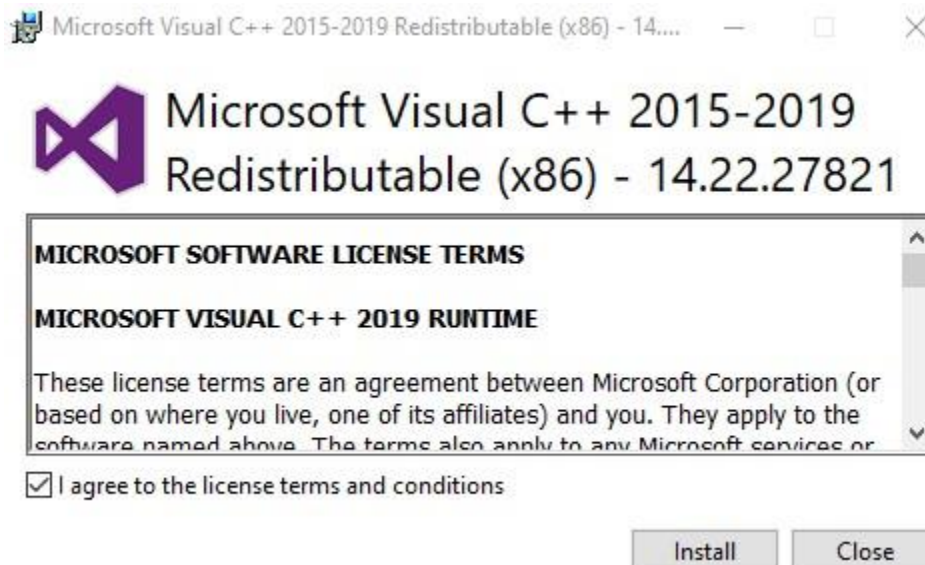

Microsoft Visual C++ 2015-2019 Redistributable (x86) - 14.22.27821

Setup Successful

After the prerequisites are installed, PC-Crash 12.1 installation will begin.

Disk 1 installation continued
Select Next to continue with installation.

PC-Crash 12.1 Setup

Welcome to the PC-Crash 12.1 Setup Wizard

The Setup Wizard will install PC-Crash 12.1 on your computer. Click "Next" to continue or "Cancel" to exit the Setup Wizard.
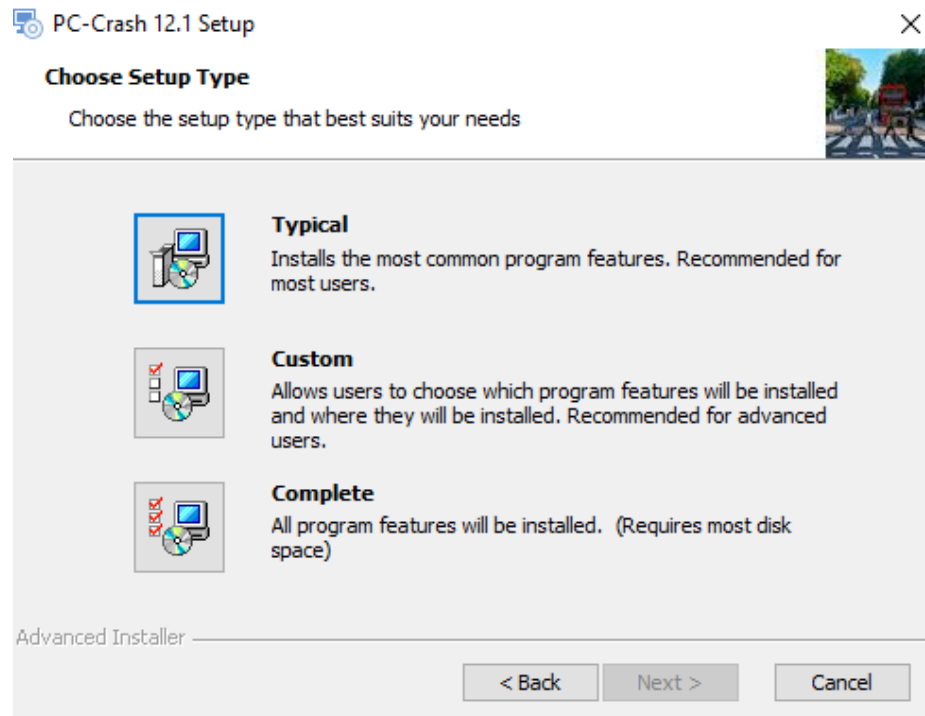

< Back   Next >   Cancel

End-User License Agreement

You must accept the terms in the License Agreement in order to proceed with installation. Note: PC-Crash is licensed by single user hardware lock. Licensing does not support remote authentication.

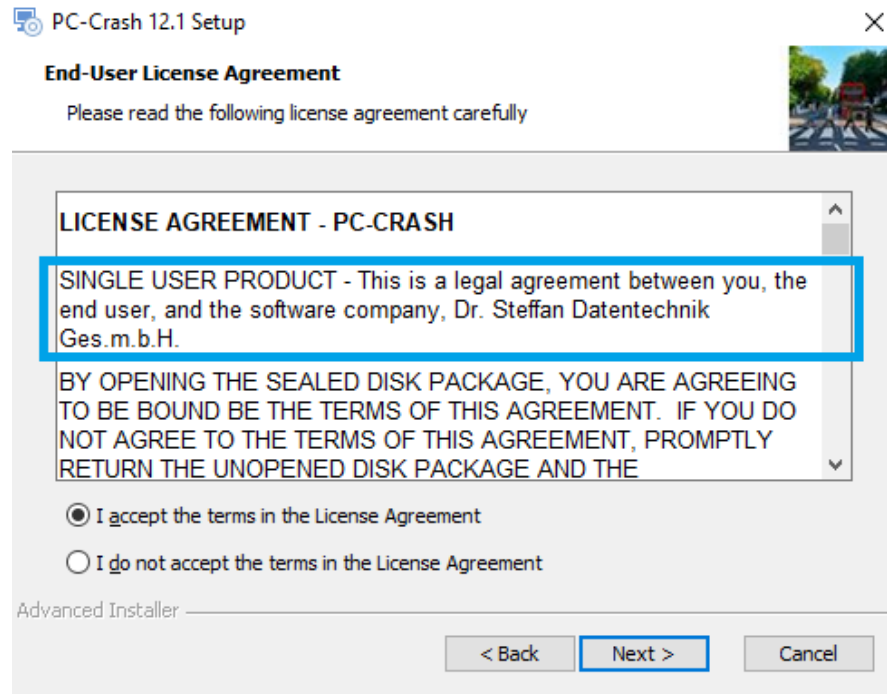

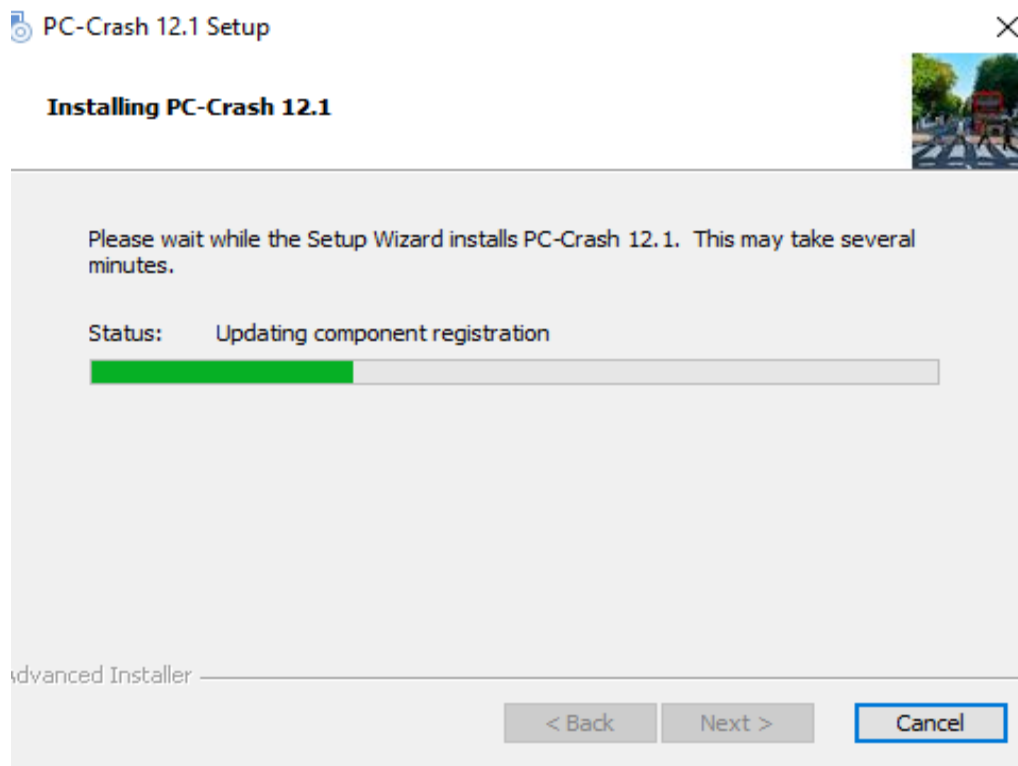

Please choose setup type

After selecting setup type, select Install.

PC-Crash 12.1 Setup ✕

Ready to Install

The Setup Wizard is ready to begin the PC-Crash 12.1 installation

Click "Install" to begin the installation. If you want to review or change any of your installation settings, click "Back". Click "Cancel" to exit the wizard.

Advanced Installer

< Back   Install   Cancel

Let the installer run. During installation, a second window may open as different components are installed. The second window will close automatically.

PC-Crash 12.1 Setup ✕

Installing PC-Crash 12.1

Please wait while the Setup Wizard installs PC-Crash 12.1. This may take several minutes.

Status: Updating component registration

Advanced Installer

< Back   Next >   Cancel

Once the installation is complete, the window below will appear. Select <u>Finish</u> to exit.

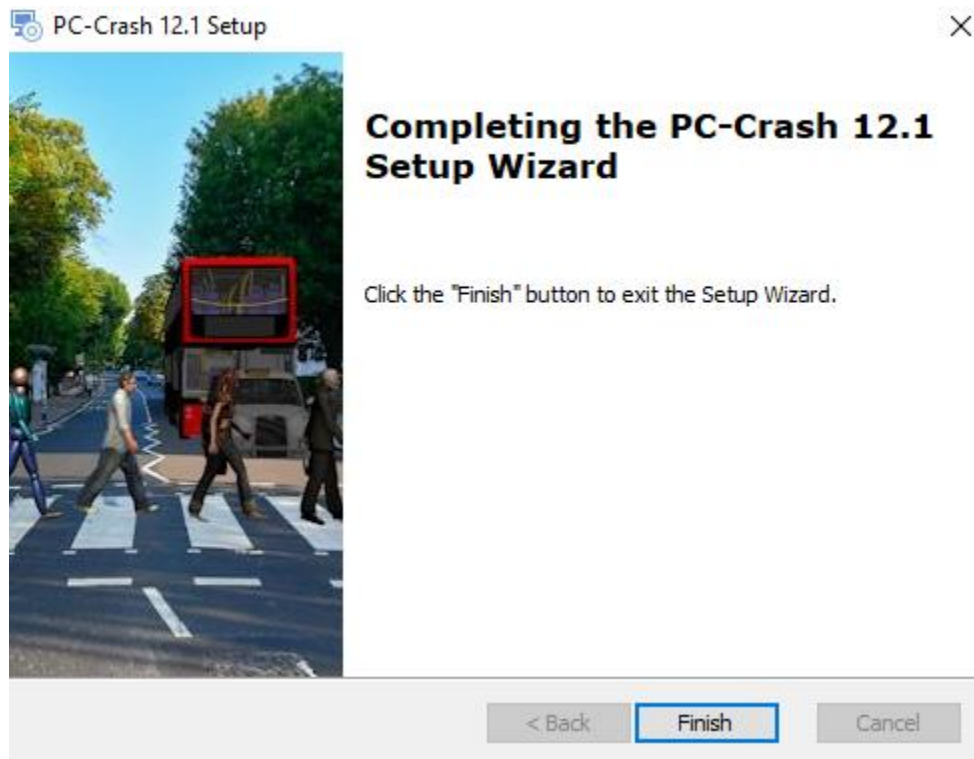

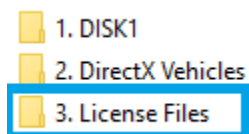

The PC-Crash 12.1 desktop icon will be visible at this point.

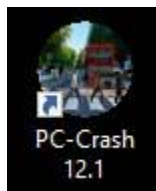

License Files

You must save the license files found in the 'License Files' folder to your computer.

There will be two .dll files. If you do not see these two files, please contact PC-Crash Support (support@pc-crash.com).

Copy both .dll files to the "PCCrash121" folder on your computer. This folder is found in "Program Files (x86)". (This should be the same location in which PC-Crash would have been installed; usually the 'C' drive). You may copy both by using the Ctrl+A shortcut or by holding down Ctrl and selecting each file. Once selected, press Ctrl+C or right-click and select copy. Then paste both files into the "PCCrash121" folder by pressing Ctrl+V or right-click and select paste.

PCCrash101	2/25/2020 1:16 PM
PCCrash102	2/25/2020 12:36 PM
PCCrash110	2/25/2020 11:50 AM
PCCrash111	2/25/2020 2:49 PM
PCCrash120	2/25/2020 11:19 AM
PCCrash121	4/22/2020 9:17 AM
PCRect42	2/25/2020 11:10 AM

When pasting the license files, do not create a new folder. Simply paste them into the "PCCrash121" folder.

If there are already license files with the same name in this folder, please select "copy and replace". At this point PC-Crash can be launched; however, further installation steps are required in order to load the DirectX vehicle shapes.

Program Files (x86) > PCCrash121

| Titlepage |

DirectX Vehicles Installation

DirectX (1 of 2)

Navigate to the DirectX vehicles folder and double-click on it.

- 1. DISK1
- 2. DirectX Vehicles
- 3. License Files

Then double-click the DirectX folder.

- DirectX
- DirectXMisc
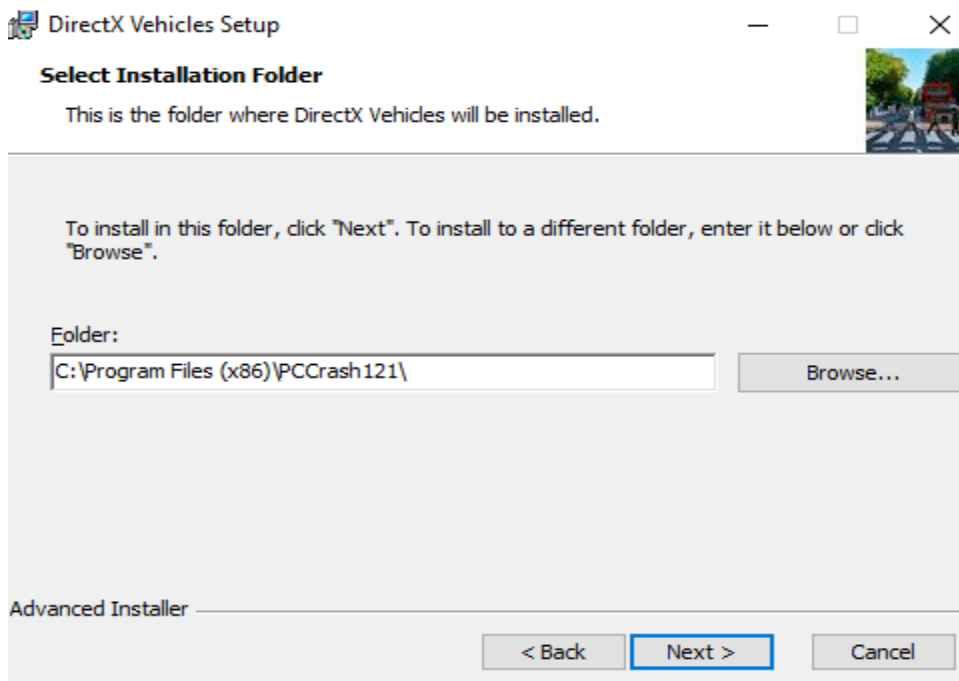

Double-click the Windows Installer file 'DirectX' (see screenshot below) to begin the DirectX Vehicles Setup Wizard.

- Direc1
- Direc2
- Direc3
- Direc4
- Direc5
- Direc6
- Direc7
- Direc8
- Direc9
- Direc10
- Direc11
- Direc12
- DirectX
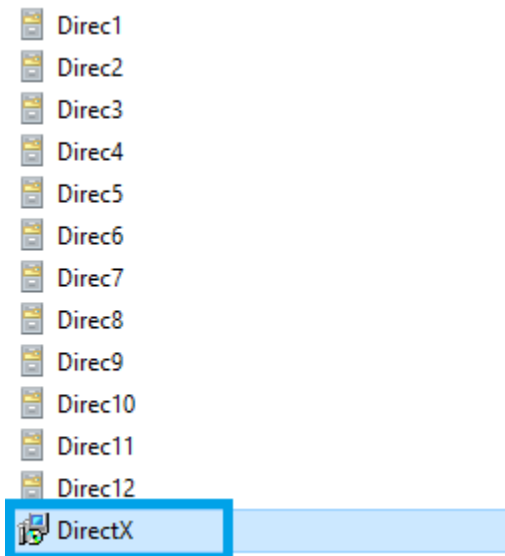

Select <u>Next</u> to continue.

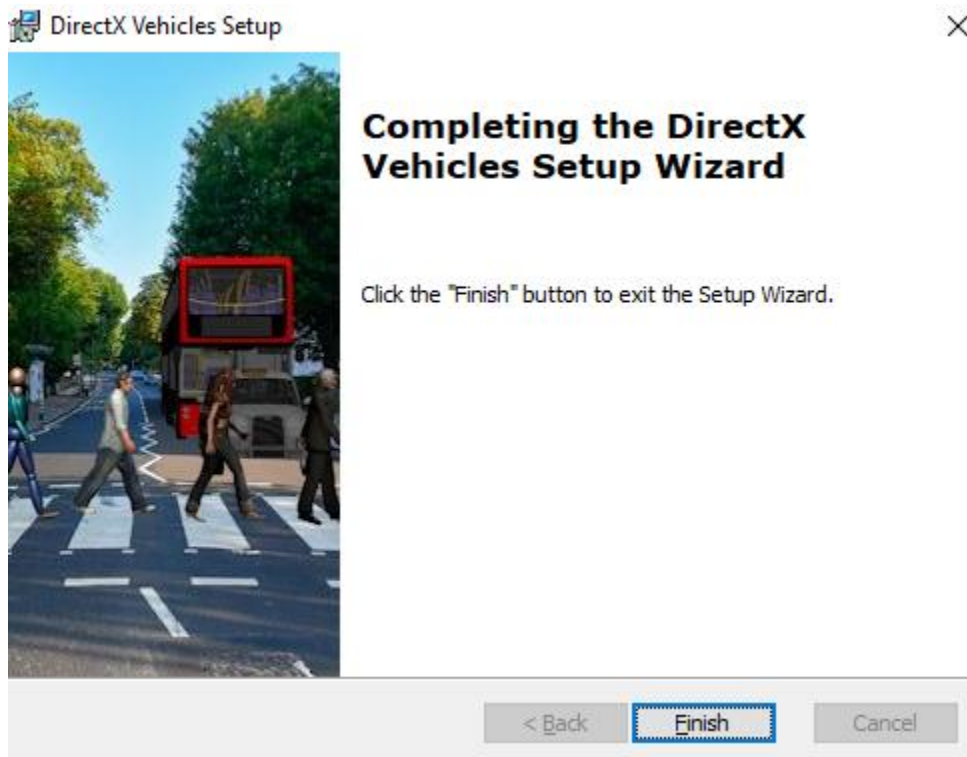

Select <u>Next</u> to continue.

Select Install.

A window may pop up asking 'Do you want to allow this app from an unknown publisher to make changes to your computer?' Select "yes". Then, installation will begin.
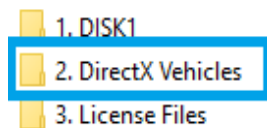

Select <u>Finish</u> to exit the Setup Wizard.

DirectX (2 of 2)

Navigate to the <u>DirectX Vehicles</u> folder and double-click to open.

Then double-click the <u>DirectXMisc</u> folder.

Double-click the Windows Installer file <u>DirectX</u> (see screenshot below) to begin the DirectX Vehicles Setup Wizard. The installation process is identical to the DirectX (1 of 2) setup above.

Once installation of 'DirectXMisc' is complete, PC-Crash has now been completely installed including DirectX vehicle shapes. Insert your dongle/hardware key to run PC-Crash. PC-Crash will open in demo version if a dongle/hardware key is not inserted.
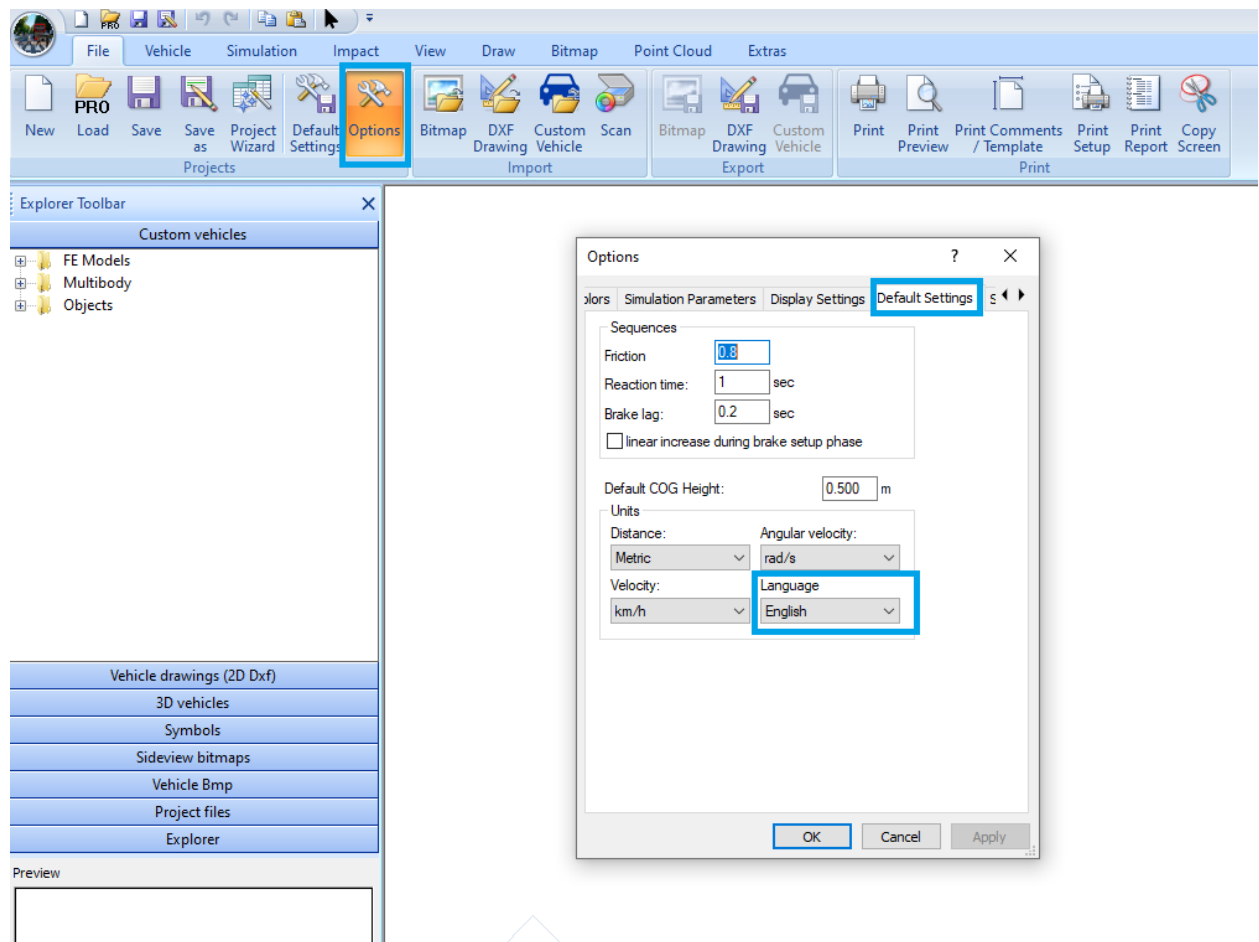

Run PC-Crash
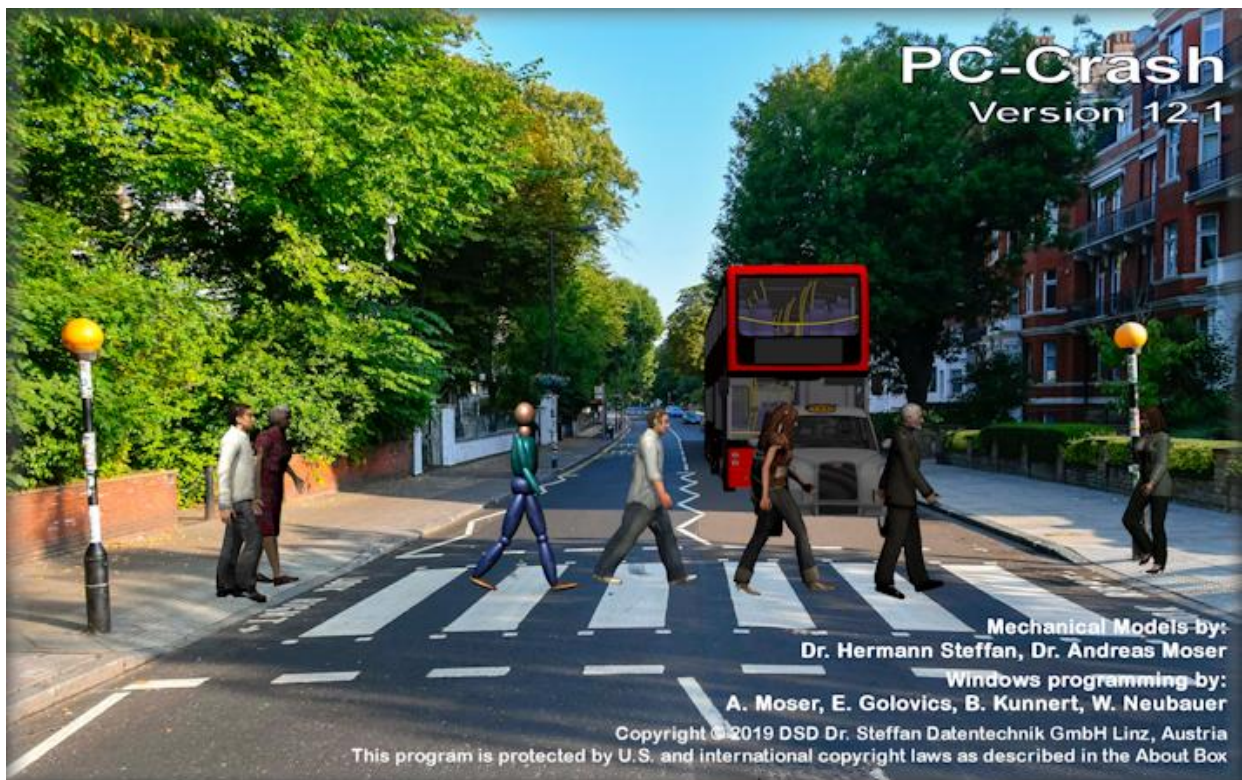

Language

The language selection window will appear the first time you launch PC-Crash. Choose language accordingly.
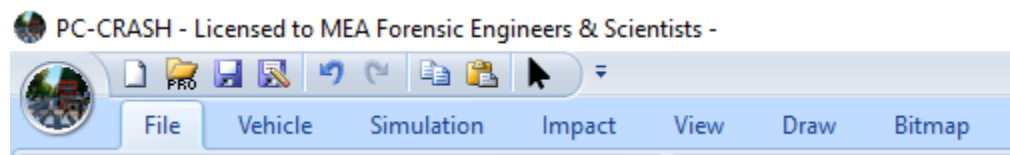

If you need to change the language later, this setting is found under <u>Options > Default</u> <u>Settings</u> (as shown below).

License verification

When PC-Crash is running (and your dongle/hardware key is inserted), your company name will appear at the top of the window.

If your company name does not appear at the top and says "Licensed to Demoversion", please double check that you have saved the license files to the 'PCCrash121' folder on your computer as noted on page 9.

Also check if your dongle/hardware key is illuminated and/or in a working USB port. Preferably use a port directly on the computer and not on a hub or extension cable.

Still running in "Demoversion"? Please see our FAQ page on our website (www.pc-crash.com) for further troubleshooting, or you can reach us at 1-877-855-5322 or 1-800-565-3040, or by email:

>PC-Crash Support:

>support@pc-crash.com

PC-Crash Updater

After launching PC-Crash, you may also have another pop-up window "updater.exe" requesting to make changes to computer. At start-up, PC-Crash will check for updates. (Please note this updater checks for updates for the current version of PC-Crash; this is not the process to upgrade to a new software version)
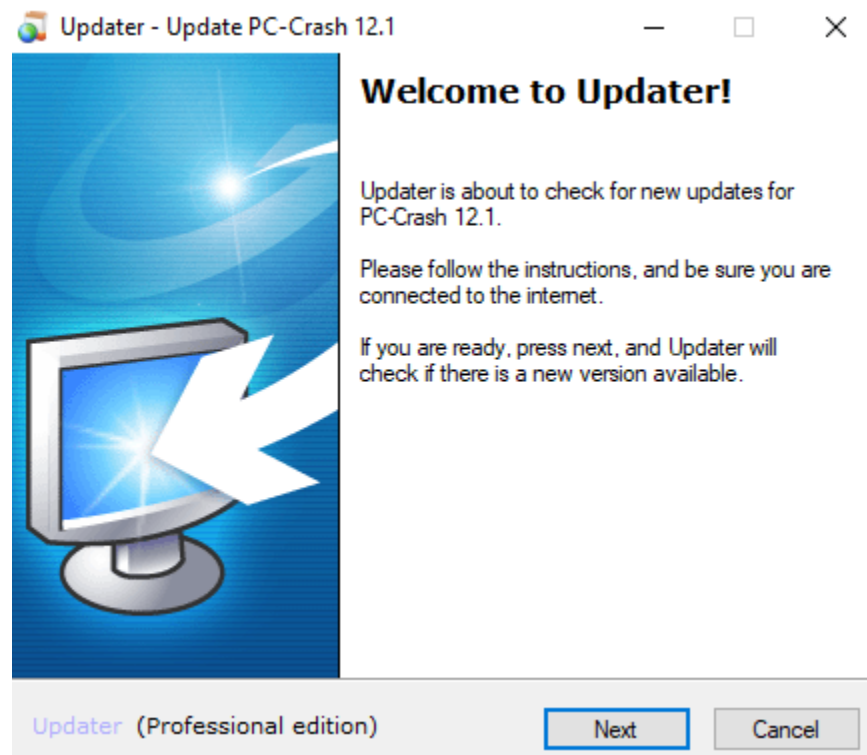

If you select "Yes" to make changes, PC-Crash will check for updates and notify you before installing updates. Once the update check is complete, you will see the following window if there no new updates:

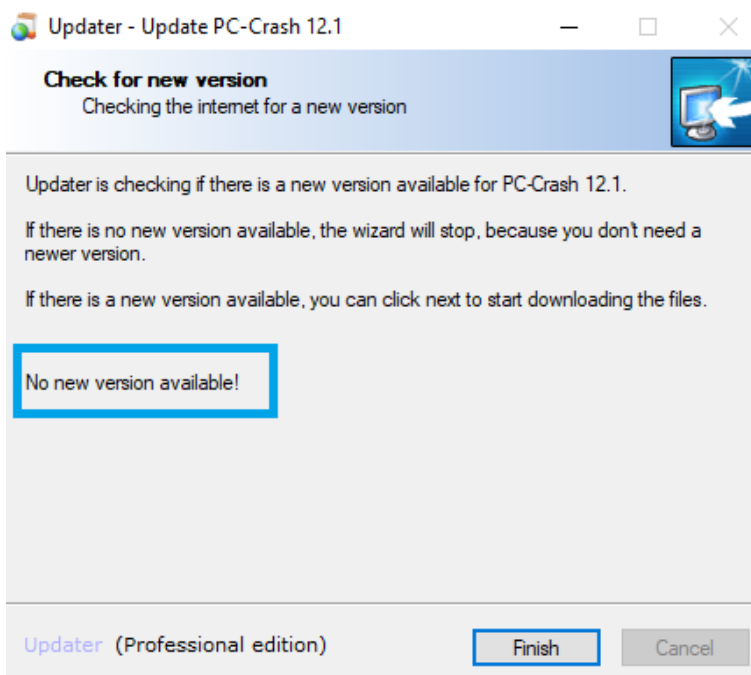

Or this window if an update is available:
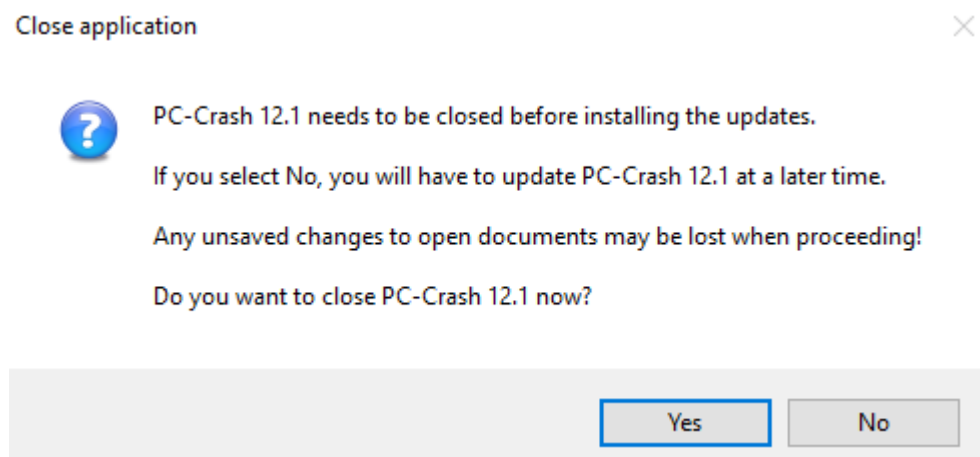

Sometimes the updater can slow down launching of PC-Crash. If you would rather not check for updates on program start, or you do not have administrator privileges on your computer (speak with your IT department on what permission settings you have), you can turn this feature off.

Once PC-Crash is open, go to "Default Settings" and scroll down until you find "Check for updates on program start". You may need to expand menus if you cannot find this option. Select or de-select the check box depending on your preference. Hit <u>Apply</u> and <u>Save</u>, then close the window.
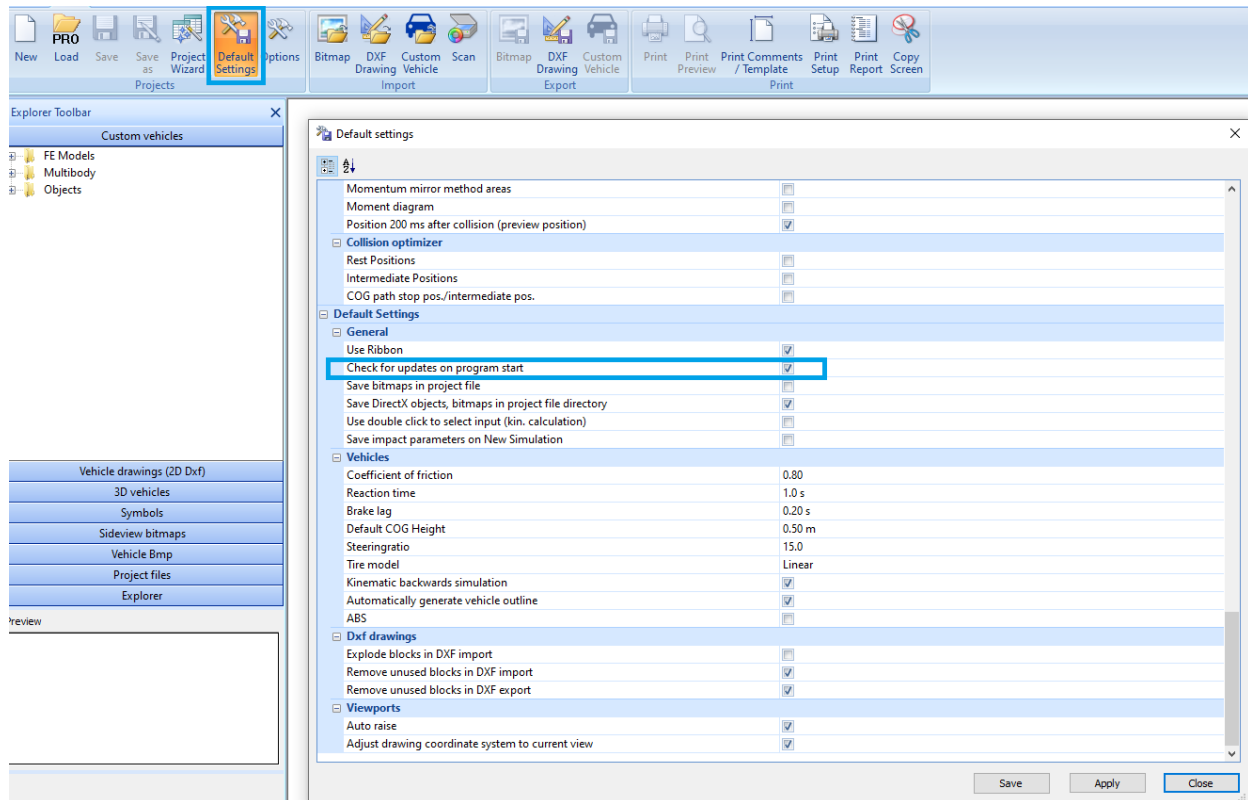

If you would like to see which version number you are operating, navigate to "About PC-Crash" which is found under the "Extras" tab.
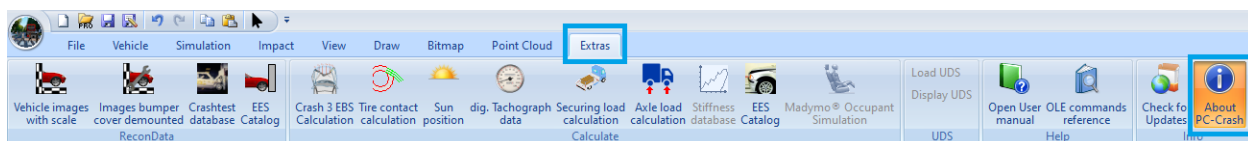

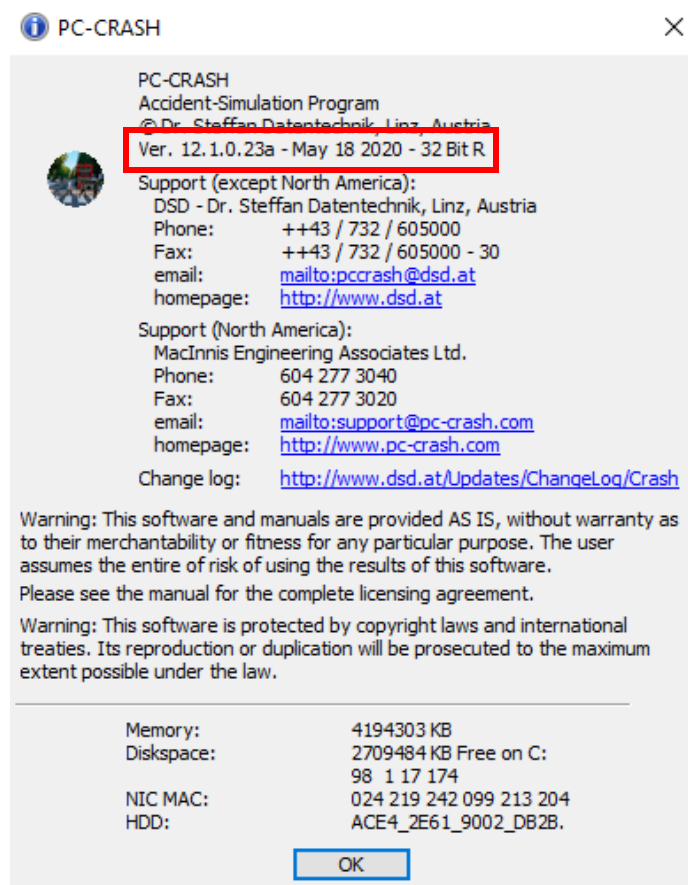

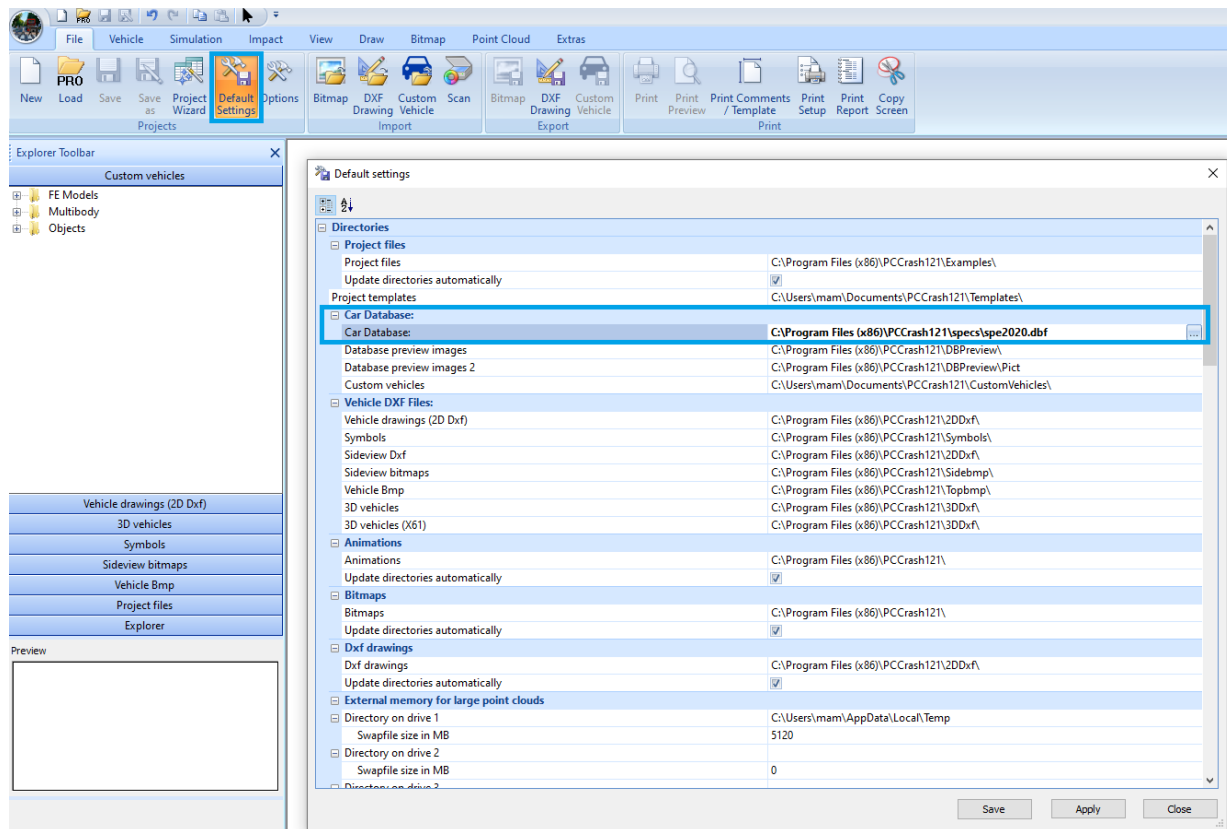

At any time, you can check for updates manually by navigating to the "Extras" tab > "Check for Updates"
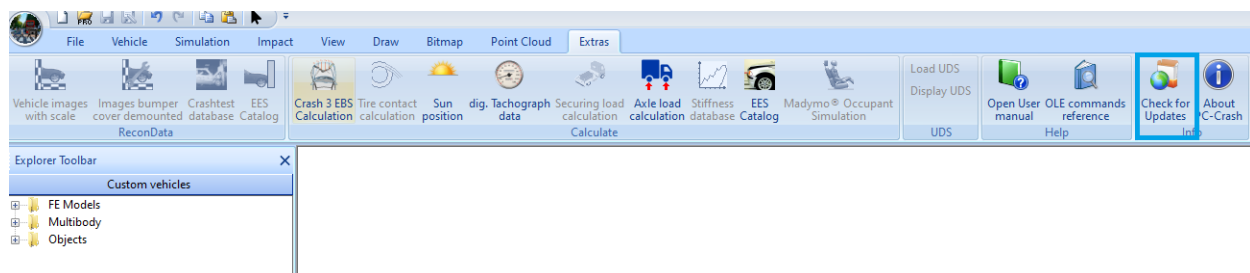

Vehicle Database

To access North American vehicles, go to "Default Settings" and change the vehicle database directory to the <u>SPECS</u> folder in your PC-Crash program folder.

To update the vehicle database to include the latest model year

Please visit our website: PC-Crash FAQ and navigate to the following:

My Vehicle database doesn't have the latest model year.

Download this SPECS update, and unzip to the specs subfolder in your PC-Crash program folder.

Select "Download this SPECS" to download the update.

Unzip the file and move it to the 'specs' subfolder in your PC-Crash program folder.
